Was there international law in the Middle Ages? Using treaties as its main source, this book examines the extent to which such a system of rules was known and followed in the period 700 to 1200. It considers how consistently international legal rules were obeyed, whether there was a reliance on justification of action and whether the system had the capacity to resolve disputed questions of fact and law. The book further sheds light on issues such as compliance, enforcement, deterrence, authority and jurisdiction, challenging traditional ideas over their role and function in the history of international law. International law in Europe, 700 – 1200 will appeal to students and scholars of medieval Europe, international law and its history, as well as those with a more general interest in warfare, diplomacy and international relations.

Eighth edition Cambridge Scholars Publishing

This text comprises cutting-edge research on one of the greatest global challenges: the failure to address systematic economic and social exclusion, and attendant violations of economic and social rights (ESR), as a driver of conflict. The text explores what the UN's obligation to maintain international peace and security can mean when it is informed by the requirement to protect and promote ESR, rights that play a crucial role in maintaining international peace and security but which are often overlooked. The book considers the extent to which Security Council mandated peace operations have been informed by human rights and efforts to promote economic and social development. The approach is to analyse the extent to which the Security Council has interacted with the General Assembly, the Economic and Social Council as well as other Charter-based mechanisms such as the Human Rights Council, and its predecessor, with particular reference to the role of the Special Procedure Mechanisms. The role of the UN High Commissioner for Human Rights is also considered. In this way, the text shows that the connection between peace and security and human rights is well recognised by these organs. In addition, the text considers States' ESR obligations stemming from the extraterritorial application of such rights in the context of peace operations. Given that States' obligations stemming from ESR have often been neglected, the book examines how such provision could be improved using ESR-grounded plans reflecting the rights to health, food, water, education, work and life. The text concludes with a call to reimagine what international peace and security can look like when it is informed by the need to recognise the emergence of post-conflict legal obligations based on broader concepts of international peace and security that draw from ESR. This text will appeal to legal scholars, policy advisors, members of the military, those working in the area of development, NGOs and final-year undergraduate and/or postgraduate students working in the areas of international law, political science and international relations, and associated fields of research.

Word storage and processing define a multi-factorial domain of scientific inquiry whose thorough

investigation goes well beyond the boundaries of traditional disciplinary taxonomies, to require synergic integration of a wide range of methods, techniques and empirical and experimental findings. The present book intends to approach a few central issues concerning the organization, structure and functioning of the Mental Lexicon, by asking domain experts to look at common, central topics from complementary standpoints, and discuss the advantages of developing converging perspectives. The book will explore the connections between computational and algorithmic models of the mental lexicon, word frequency distributions and information theoretical measures of word families, statistical correlations across psycho-linguistic and cognitive evidence, principles of machine learning and integrative brain models of word storage and processing. Main goal of the book will be to map out the landscape of future research in this area, to foster the development of interdisciplinary curricula and help single-domain specialists understand and address issues and questions as they are raised in other disciplines.

Issues in Coursebook Evaluation Routledge

The Agreement on Agriculture (AoA) was adopted to eliminate the illegitimate use of trade distorting agricultural subsidies and, thereby, reduce and avoid the negative effects subsidies have on global agricultural trade. However, the AoA has been fashioned in a way that is enabling developed countries to continue high levels of protectionism through subsidization, whilst many developing countries are facing severe and often damaging competition from imports artificially cheapened through subsidies. The regulation of subsidies by the World Trade Organisation (WTO) has been a highly sensitive issue. This is mainly due to the fear of compromising on food security, especially by developed countries. Developing countries have suffered negatively from the subsidy programmes of developed countries, which continue to subsidize their agricultural sector. This position of developing countries in the global trade system, which has been described as weak, has drawn criticism of the WTO, namely that it does not protect the interests of the weak developing nations, but rather strengthens the interests of the strong developed nations. The green box provisions which are specifically designed to regulate payments that are considered trade neutral or minimally trade distorting have grossly been manipulated by developed countries at the mercy of the AoA. Developed countries continue to provide trade distorting subsidies under the guise of green box support. This is defeating the aims and objectives of the AoA. The study examines the regulation of WTO agricultural subsidies from the developing countries' perspective. It looks at the problems WTO member states face with trade distorting subsidies, but focuses more on the impact these have on developing states. It scrutinizes the AoA's provisions regulating subsidies by adopting a perspective to identify any loopholes or shortcomings which undermine the interests and aspirations of developing countries. This is against the background that some of the provisions of the AoA are lenient towards the needs of developed countries at the expense of developing countries.

This volume takes a distinctive look at the climate change debate, already widely studied across a number of disciplines, by exploring the myriad linguistic and discursive perspectives and approaches at play in the climate change debate as represented in a variety of genres. The book focuses on key linguistic themes, including linguistic polyphony, lexical choices, metaphors, narration, and framing, and uses examples from diverse forms of media, including scientific documents, policy reports, op-eds, and blogs, to shed light on how information and knowledge on climate change can be represented, disseminated, and interpreted and in turn, how they can inform further discussion and debate. Featuring contributions from a global team of researchers and drawing on a broad array of linguistic approaches, this collection offers an extensive overview of the role of language in the climate change debate for graduate students, researchers, and scholars in applied linguistics, environmental communication, discourse analysis, political science, climatology, and media studies.

"As commercial magazines began to flourish in the 1920s, they promoted an expanding network of luxury railway hotels and transatlantic liner routes. The leading monthlies--among them *Mayfair*, *Chatelaine*, and *La Revue Moderne*--presented travel as both a mode of self-improvement and a way of negotiating national identity. *Magazines, Travel and Middlebrow Culture* announces a new cross-cultural approach to periodical studies, reading both French- and English-language magazines in relation to an emerging transatlantic middlebrow culture. Mainstream magazines, Hammill and Smith argue, forged a connection between upward mobility and geographic mobility. Students and scholars of Canadian studies, cultural and social history, publishing, literary studies, cultural studies, communications studies, and print culture will find this book, a first in Canadian middlebrow culture, a must-have on their

shelf."-- Provided by publisher.

Jones, Barry Owen (1932–). Australian politician, writer and lawyer, born in Geelong. Educated at Melbourne University, he was a public servant, high school teacher, television and radio performer, university lecturer and lawyer before serving as a Labor MP in the Victorian Parliament 1972–77 and the Australian House of Representatives 1977–98. He took a leading role in reviving the Australian film industry, abolishing the death penalty in Australia, and was the first politician to raise public awareness of global warming, the 'post-industrial' society, the IT revolution, biotechnology, the rise of 'the Third Age' and the need to preserve Antarctica as a wilderness. In the Hawke Government, he was Minister for Science 1983–90, Prices and Consumer Affairs 1987, Small Business 1987–90 and Customs 1988–90. He became a member of the Executive Board of UNESCO, Paris 1991–95 and National President of the Australian Labor Party 1992–2000, 2005–06. He was Deputy Chairman of the Constitutional Convention 1998. His books include *Decades of Decision 1860– (1965)*, *Joseph II (1968)*, *Age of Apocalypse (1975)*, and he edited *The Penalty is Death (1968)*. *Sleepers, Wake!: Technology and the Future of Work* was published by Oxford University Press in 1982, became a bestseller and has been translated into Chinese, Japanese, Korean, Swedish and braille. The fourth edition was published in 1995. *Knowledge Courage Leadership*, a collection of speeches and essays, appeared in 2016. He received a DSc for his services to science in 1988 and a DLitt in 1993 for his work on information theory. Elected FTSE (1992), FAHA (1993), FAA (1996) and FASSA (2003), he is the only person to have become a Fellow of four of Australia's five learned Academies. Awarded an AO in 1993, named as one of Australia's 100 'living national treasures' in 1997, he was elected a Visiting Fellow Commoner of Trinity College, Cambridge in 1999. His autobiography, *A Thinking Reed*, was published in 2006 and *The Shock of Recognition*, about music and literature, in 2016. In 2014 he received an AC for services 'as a leading intellectual in Australian public life'. *What Is to Be Done* was published by Scribe in 2020.

We have witnessed a digital revolution that affects the dynamics of existing traditional social, economic, political and legal systems. This revolution has transformed espionage and its features, such as its purpose and targets, methods and means, and actors and incidents, which paves the way for the emergence of the term cyberespionage. This book seeks to address domestic and international legal tools appropriate to adopt in cases of cyberespionage incidents. Cyberespionage operations of state or non-state actors are a kind of cyber attack, which violates certain principles of international law but also constitute wrongful acquisition and misappropriation of the data. Therefore, from the use of force to state responsibility, international law offers a wide array of solutions; likewise, domestic regulations through either specialized laws or general principles stipulate civil and criminal remedies against cyberespionage. *Confronting Cyberespionage Under International Law* examines how espionage and its applications have transformed since World War II and how domestic and international legal mechanisms can provide effective legal solutions to this change, hindering the economic development and well-being of individuals, companies and states to the detriment of others. It shows the latest state of knowledge on the topic and will be of interest to researchers, academics, legal practitioners, legal advisors and students in the fields of international law, information technology law and intellectual property law.

This book offers a snappy but comprehensive investigation of how the resource needs of today could become the resource conflicts of tomorrow. As the most populous country in the world, the security of China's "rice bowl" is not only a top political priority for China's policymakers but increasingly a critical global concern as the country emerges as a leading food importer and a major player in outward agricultural investment.

This book sheds light on China's efforts, both at home and abroad, to safeguard its food security and how these efforts will affect global food systems. This book will be of interest to industry analysts, institutional investors, and scholars of China's global rise.

The spread of English as an international language along with the desire to maintain local languages lead us to consider multilingualism as the norm rather than the exception. Consequently, bi/multilingual education has bloomed over the last decades. This volume deals with one such type of education currently in the spotlight as an essentially European strategy to multilingualism, CLIL (Content and Language Integrated Learning), in which curricular content is taught through a foreign language. The book contributes new empirical evidence on its effects on linguistic and attitudinal outcomes focusing on bi/multilingual learners who acquire English as an additional language. Moreover, it presents critical analyses of factors influencing multilingual education, the effects of CLIL on both language and content learning, and the contrast between CLIL and other models of instruction. The research presented suggests that CLIL can greatly enhance language acquisition in multilingual settings.

From the ghosts which reside in Midlands council houses in Every Day is Mother's Day to the resurrected historical dead of the Booker Prize-winning Wolf Hall and Bring up the Bodies, the writings of Hilary Mantel are often haunted by supernatural figures. One of the first book-length studies of the writer's work, Reading Hilary Mantel explores the importance of ghosts in the full range of her fiction and non-fiction writing and their political, social and ethical resonances. Combining material from original interviews with the author herself with psychoanalytic, historicist and deconstructivist critical perspectives, Reading Hilary Mantel is a landmark study of this important and popular contemporary novelist.

Inverse problems of spectral analysis consist in recovering operators from their spectral characteristics. Such problems often appear in mathematics, mechanics, physics, electronics, geophysics, meteorology and other branches of natural science. This monograph is devoted to inverse problems of spectral analysis for ordinary differential equations. Its aim is to present the main results on inverse spectral problems using the so-called method of spectral mappings, which is one of the main tools in inverse spectral theory. The book consists of three chapters: In Chapter 1 the method of spectral mappings is presented in the simplest version for the Sturm-Liouville operator. In Chapter 2 the inverse problem of recovering higher-order differential operators of the form, on the half-line and on a finite interval, is considered. In Chapter 3 inverse spectral problems for differential operators with nonlinear dependence on the spectral parameter are studied.

This book explores the connection between British and German officer cadets' perceptions of the past and their motivations for enlisting in the military forces in the United Kingdom and Germany. Drawing upon qualitative interviews and survey data conducted at officers' academies in the UK and Germany, the author offers a comparative analysis using differing approaches towards history and memory in Britain and Germany, while considering the roles of individual goals and societal orientations in the decision to enlist. Employing the notion of pragmatic professionalism, which reflects the fact that occupational and institutional reasons for enlisting are not opposite points on a single scale, Professionalism, Memory and Identity examines history-orientated reasons for enlistment by shedding light on officer cadets' values, beliefs and wider cultural understandings of the past. With attention to differences in motivation as a result of differing national backgrounds and former military training, as well as the extent to which these divergences contribute to the emergence of different types of soldiers in the two countries, this comparative, international study will appeal to scholars of sociology, politics and war studies with interests in the military profession and the role of history in contemporary Britain and Germany.

The idea of American exceptionalism has made frequent appearances in discussions of criminal justice policies--as it has in many other areas--to help portray or explain problems that are especially acute in the U.S., including mass incarceration, retention of the death penalty, racial and ethnic disparities, and the War on Drugs. While scholars do not universally agree that it is an apt or useful framework, there is no question that the U.S. is an outlier, when compared with other industrialized democracies, in its punitive and exclusionary criminal justice policies. This volume of essays deepens the debate of American exceptionalism in crime and punishment through comparative political, economic, and historical analyses, with an orientation toward forward-looking prescriptions for American law, policy, and institutions of government. The chapters expand the literature to neglected areas such as community supervision, parole release, and collateral consequences of conviction; explore claims of causation, in particular the view that the U.S. history of slavery and racial inequality has been a primary driver of crime policy; examine arguments that the framework of multiple governments and localized crime control, populist style of democracy, and laissez-faire economy are implicated in problems of both crime and punishment; and assess theories that cultural values are the most salient predictors of penal severity and violent crime. With an outstanding list of contributors edited by a leading authority on punishment, this volume demonstrates that the largest problems of crime and justice cannot be brought into focus from the perspective of single jurisdiction, and that comparative inquiries are necessary for an understanding of the current predicament in the US.

Materials and Methods in ELT is an essential resource for teachers or for those engaged in taking professional courses relating to all aspects of English language teaching. Now available in its 3rd edition, this popular teachers' guide offers a comprehensive and useful introduction to the principles and practice of teaching English as a foreign/second language. It examines the ideas behind current methodology and teaching materials, in addition to offering a practical guide to approaching materials and methods, evaluation and adaptation, technology for materials and methods, and teaching in under-resourced classrooms. These principles are then related to the individual language skills of reading, listening, speaking, and writing. The authors examine the different methodologies available to teachers for organizing and running an ELT classroom; discussing group and pair work, individualization, classroom observation, and the teachers' role in the contemporary ELT context. Updated throughout, the 3rd edition features a new section on technology for materials and methods, as well as a new chapter on IT in English language teaching, and inclusion of new samples from current teaching materials.
