In Crossover Fiction, Sandra L. Beckett explores the global trend of crossover literature and explains how it is transforming literary canons, concepts of readership, the status of authors, the publishing industry, and bookselling practices. This study will have significant relevance across disciplines, as scholars in literary studies, media and cultural studies, visual arts, education, psychology, and sociology examine the increasingly blurred borderlines between adults and young people in contemporary society, notably with regard to their consumption of popular culture.

Surgical site infections are caused by bacteria that get in through incisions made during surgery. They threaten the lives of millions of patients each year and contribute to the spread of antibiotic resistance. In low- and middle-income countries, 11% of patients who undergo surgery are infected in the process. In Africa, up to 20% of women who have a caesarean section contract a wound infection, compromising their own health and their ability to care for their babies. But surgical site infections are not just a problem for poor countries. In the United States, they contribute to patients spending more than 400 000 extra days in hospital at a cost of an additional US \$10 billion per year. No international evidence-based guidelines had previously been available before WHO launched its global guidelines on the prevention of surgical site infection on 3 November 2016, and there are inconsistencies in the interpretation of evidence and recommendations in existing national guidelines. These new WHO guidelines are valid for any country and suitable to local adaptations, and take account of the strength of available scientific evidence, the cost and resource implications, and patient values and preferences.

Violence is all around us; yet, despite its widespread prevalence, we remain unclear about its causes. In this book Felicity de Zulueta - begins by defining "violence" as distinct from "aggression", and then attempts to trace its origins, highlighting the polarization between those who believe mankind to be innately violent and those who see violence as the outcome of man's life experiences. As a result of her investigations, the author suggests that the current high level of violence may well be linked to the effects of childhood and adult trauma which appear to be far more widespread than has hitherto been acknowledged. These findings are relevant to understanding why "normal" people can become violent in certain conditions. This is a second edition and has been fully updated. A new chapter on terrorism has been added.

How we think of ourselves depends largely on what we remember from our lives, and what we remember is biased in many ways by how we think of ourselves. The complex interplay of the self and memory is the topic of this volume. Economy of the Unlost Oxford University Press, USA

In The Bi-Personal Field: Experiences in Child Analysis, Antonino Ferro devised a new model of the relationship between patient and analyst. In the Analyst's Consulting Room complements and develops this model by concentrating on adults. From the standpoint of the "analytic field", Antonino Ferro explores basic psychoanalytic concepts, such as criteria for analysability and ending the analysis, transformations that occur during the session, the impasse and negative therapeutic reactions, sexuality and setting. The author explores certain themes in greater depth, including: \* ways in which characters that appear during sessions can be interpreted \* continual indications given by the patient during the emotional upheavals of the field \* the function of "narrator" which the analyst takes on to mark the boundaries of the possible worlds. Through clinical narrative, Ferro renders Bion's often complex ideas in a very personal and accessible way, making this book invaluable for psychoanalysts, psychotherapists, psychiatrists and psychologists.

This book contains the guidelines adopted by the Conference of the Parties at its second (2007), third (2008) and fourth (2010) sessions. These seven guidelines cover a wide range of provisions of the WHO Framework Convention on Tobacco Control, such as: the protection of public health policies with respect to tobacco control from commercial and other vested interests of the tobacco industry; protection from exposure to tobacco smoke; packaging and labelling of tobacco products; and tobacco advertising, promotion and sponsorship; and demand reduction measures concerning tobacco dependence and cessation. These guidelines are intended to help Parties to meet their obligations under the respective provisions of the Convention. They reflect the consolidated views of Parties on different aspects of implementation, their experiences and achievements, and the challenges faced. The guidelines also aim to reflect and promote best practices and standards that governments would benefit from in the treaty-implementation process.

From the moment he was born, Andrew Bridge and his mother Hope shared a love so deep that it felt like nothing else mattered. Trapped in desperate poverty and confronted with unthinkable tragedies, all Andrew ever wanted was to be with his mom. But as her mental health steadily declined, and with no one else left to care for him, authorities arrived and tore Andrew from his screaming mother's arms. In that moment, the life he knew came crashing down around him. He was only seven years old. Hope was institutionalized, and Andrew was placed in what would be his devastating reality for the next eleven years--foster care. After surviving one of our country's most notorious children's facilities, Andrew was thrust into a savagely loveless foster family that refused to accept him as one of their own. Deprived of the nurturing he needed, Andrew clung to academics and the kindness of teachers. All the while, he refused to surrender the love he held for his mother in his heart. Ultimately, Andrew earned a scholarship to Wesleyan, went on to Harvard Law School, and became a Fulbright Scholar. Andrew has dedicated his life's work to helping children living in poverty and in the foster care system. He defied the staggering odds set against him, and here in this heartwrenching, brutally honest, and inspirational memoir, he reveals who Hope's boy really is.

Since the mid-1970s, adoption practices in the United States have changed dramatically, and the confidentiality maintained in the past is no longer the norm. The trend is toward openness in adoption in which either mediated (through an adoption agency) or direct contact occurs between the adoptive family and birth parent(s). Some adoption professionals argue that openness is harmful and experimental while others argue that the secrecy of confidential adoptions has been harmful to all parties involved. Who's right? In Openness in Adoption, this question is addressed via a nationwide study of 720 individuals (190 adoptive fathers, 190 adoptive mothers, 171 adopted children, and 169 birthmothers) that was conducted over a five-year period. The book begins by presenting the issues and debates surrounding open adoptions and then examines them from the perspective of the adopted children, adoptive parents, and birth mothers. The volume concludes with implications for adoption practice, public policy, and future research. A groundbreaking volume, Openness in Adoption provides a wealth of information to professionals and practitioners in the fields of family studies, sociology, developmental psychology, social work, clinical psychology, and social psychology.

Global Guidelines for the Prevention of Surgical Site Infection FrancoAngeli

From Aristotle to contemporary soap operas, friendship has always been a subject of fascination. But scholarly investigation of the broad social relevance of friendship has been neglected. Rethinking Friendship describes the varied nature of personal relationships today, and also locates friendship in contemporary debates about individualization and the supposed "collapse of community." Exploring friendships with partners and family as well as "friends," the book reveals ways in which friends and friendlike ties are an important and unacknowledged source of social glue. Using a rigorous analysis of in-depth interviews, the authors develop a set of innovative concepts--friendship repertoires (the range of friendships people have); friendship modes (the way people make and maintain friendships over time); and patterns of suffusion (the extent to which boundaries between friends and family become blurred). These concepts form the basis of a typology of personal communities that vary in the roles played by friends, family, partners, and neighbors. Combining scholarly depth and rich description, this absorbing and accessible book will appeal to all those interested in informal social relationships, including students of methodology and policymakers. With its

challenge to pessimistic commentators, Rethinking Friendship urges us to resist sweeping generalizations and to acknowledge the sheer diversity of social life today.
