In the journal articles, historiographical essays, and numerous references to the political thought of Adriano Olivetti, the term constantly used to characterize his thinking is 'utopia'. It is from this word, or rather, the misuse of this word, where one can begin to shed light on Olivettian political thinking. The term 'utopia', which has come to designate an entire vein of political literature, has also entered into common usage to define an impossible project, a wide-eyed dream; and a 'utopian' is that individual who longs for abstract projects instead of concrete ideas. It would be unproductive to resort to the diverse arguments of Firpo, of Mannheim, or of Bloch, of the philosophers of the Frankfurt School or others, since, as Giovanni Sartori has observed, after the word ceases to exist – where utopia is understood to mean impossibility – the impossibilities still remain. So, precisely because the literature on the political thought of Olivetti appears to suffer greatly from 'empirical' influences, it seems necessary to confront the complexities of his presumed utopianism with a methodological approach. This book investigates the inherent 'impossibilities', if they indeed exist, in the political thought of Olivetti. It also seeks to understand, as a result, if the Olivettian ideal is lacking in any true consistency, since it is secluded from an adequate analysis of historical reality, or if it is, rather, an idealism which does not lose sight of reality, in an attempt to overturn it as the basis for a plausible global vision. This book will be of interests to students and scholars in history, political economy and philosophy.

The Second Century occupies a central place in the development of ancient Christianity. The aim of the book is to examine how in the cultural, social, and religious efflorescence of the Second Century, to be witnessed in phenomena such as the Second Sophistic, Christianity found a peculiar way of integrating into the more general transformation of the Empire and how this allowed the emerging religion to establish and flourish in Graeco-Roman society. Hadrian's reign was the starting point of that process and opened new possibilities of self-definition and external self-presentation to Christianity, as well as to other social and religious agencies. Differently from Judaism, however, Christianity fully seized the opportunity, thus gaining an increasing place in Graeco-Roman society, which ultimately led to the first Christian peace under the Severan emperors. The point at issue is examined from a multi-disciplinary perspective (including archaeology, cultural, religious, and political history) to challenge well-established, but no longer satisfactory, historical and hermeneutical paradigms. The contributors aim to examine institutional issues and sociocultural processes in their different aspects, as they were made possible on Hadrian's initiative and resulted in the emergence of early Christianity into the Roman Empire. Over the past two centuries the Christian faith has spread to all continents. Although more global than ever, Christians are religious minorities in most societies. Religious freedom is hardly universal. In the past fifty years, millions of people have been uprooted from their traditional homelands in Asia, Africa, and Latin America. Some have emigrated to Western Europe and North America. The West has become the scene of cultural, linguistic, and religious variety on a scale unimagined in 1900. Today, the full range of faiths and religious practices from all continents are present in Europe and North America. Christians are challenged to come to terms with this changed situation. These developments have intensified religious plurality. Christians all over the world are being urged to understand and engage with this new situation. This volume highlights this new reality and specifies some sources for engagement, not least among them the Judeo-Christian scriptures--fundamental to all "Christianities"--that emerged out of religious plural contexts. On the basis of their faith in the Triune God disclosed in this text, all followers of Jesus Christ must interact with these opportunities in today's radically context-sensitive world.

This book examines the historical process that led to the foundation of the Italian Republic and its constitution, viewed through the personal experiences and political reflections of Adriano Olivetti (between 1919 and 1960), general manager and president of the well-known typewriter manufacturer "Ing. C. Olivetti & C." An unbroken line of reasoning linked his maturing political reflections during the two post-war periods. The historical context of the 1950s did not prove to be very propitious, but the guidelines dispersed throughout the Italian cultural and political world from the movement that Olivetti founded were certainly seminal – generating a legacy of ideas that has only in part been recognized. What makes this study distinctive is the original approach to reading the history of Italy through Adriano Olivetti's eyes and thoughts, far from the more common Christian Democratic or Communist perspective of those years. It is simply another view of what the Italian Republic could be and was not.
