His life and times Hardie Grant Publishing

From the arid deserts of Tucson, Arizona to the icy forests of Poori, Finland to the tropical beaches of New South Wales, Australia to the urban jungle of downtown Manhattan, critics Alanna Stang and Christopher Hawthorne have travelled to the farthest reaches of the globe to find all that is new in the design of sustainable, or "green" homes. The result is more than thirty-five residences in fifteen countries, and nearly every conceivable natural environment, designed by a combination of star architects and heretofore unknown practitioners including Santiago Calatrava, Shigeru Ban, Miller/Hull, Rick

Joy, Lake Flato, Kengo Kuma, Glenn Murcutt, Pugh & Scarpa, Werner Sobek, and many others. Projects are presented with large colour images, plans, drawings, and an accompanying text that describes their green features and explains how they work with and in the environment. The Green House is not only a beautiful object in its own right, but is sure to be an indispensable reference for anyone building or interested in sustainable design.

portrays, for the first time in one volume, an overview of the finest built architecture from around the world completed between 1900 and 1999. The unprecedented global scope of this collection of over 750 key buildings juxtaposes architectural icons with regional masterpieces. Divided into six world regions, the collection is the result of a rigorous selection process and the input of more than 150 specialists from around the world. Each building is fully illustrated and described by a short text. In addition, a mass of useful information is provided. This includes details of architects' practices and extensive indexes.

Comprehensive world data illustrates the changing economic and political contexts of architectural production throughout the century.

The Story of Buildings Phaidon Press

Visionary Danish architect Jørn Utzon was just thirty-eight years old when in 1957 he was named the surprise winner of an international competition to design the Sydney Opera House in Australia. His bold design consisting of five performance halls topped by billowing concrete shells clad in ceramic tile is universally recognized as a masterpiece of twentieth-century architecture. While this early triumph brought Utzon worldwide fame, it overshadowed a larger body of work of great importance for modern architecture. Utzon's highly

diverse projects around the globe, from the National Assembly in Kuwait and Melli Bank in Tehran, Iran, to the Bagsværd Church and numerous houses in Denmark, are testaments to his belief that modernism need not sacrifice local character to be forward thinking. Organized into six thematic chapters—place, working method, building culture, construction, materiality, and living—Jørn Utzon presents all of his important work as well as many of his lesser-known, though equally important competition entries, furniture designs, and other built projects.

Design has intrinsic, economic value. To make this value tangible, design features of buildings need to be explored, measured, and taken into account when initiating projects and financing their construction. It is as calculable as the extrinsic value of a project. However, we need concepts, strategies, methods, techniques, and tools to do just that. The Value Based Design approach and Design-Added Value (D-AV) methodology in this book enables architects, engineers, contractors and owner-clients of buildings to benefit from extraordinary design and construction features. It explains the rationale and motivation for D-

AV methodology, outlines and illustrates this methodology with examples, provides complete and detailed examples of how the key analysis techniques work through historical case studies, and describes specific methods used in application of the D-AV methodology, such as Bayesian statistics, cost benefit analysis, pairwise comparison techniques, cognitive walkthroughs, and optimization.

'Martin wore tight pants that were striped red, white and blue, like a Union Jack, and an embroidered Afghan vest. In front of his face he carried, like a lollipop, a smile on a stick. As he went, he bowed to passers-by. Even on King's Road, he stood out.' Martin Sharp's art was as singular as his style. He blurred the boundaries of high art and low with images of Dylan, Hendrix and naked flower children that defined an era. Along the way the irreverent Australian was charged with obscenity and collaborated with Eric Clapton as he drew

rock stars and reprobates into his world. In this richly told and beautifully written biography, Joyce Morgan captures the loneliness of a privileged childhood, the heady days of the underground magazine Oz as well as the exuberant creativity of Swinging London and beyond. Sharp pursued his quixotic dream to realise van Gogh's Yellow House in Australia. He obsessively championed eccentric singer Tiny Tim and was haunted by Sydney's Luna Park. Charismatic and paradoxical, he became a recluse whose phone never stopped ringing. There was no one like Martin Sharp. When he died, he was described as a stranger in a strange land who left behind a trail of stardust.

The Sydney Opera House
Lund Humphries Pub Limited

Since the announcement of Jørn Utzon's winning Sydney Opera House competition entry in early 1957 the project has excited controversy. Testing the very boundaries of technology, the gestation of this sublime building was long and

fraught with problems, none more so than the departure of its architect in early 1966, never to return. With the building only a series of empty shells there was much for Utzon's successor, the 34-year old Sydney architect Peter Hall, to resolve. For both architects the Opera House would be a 'poisoned chalice' -- a compelling and unprecedented challenge, but one that presented almost insurmountable obstacles. But while Utzon's reputation has been restored, Hall's completion of the building has, ultimately, brought little recognition and enduring condemnation. It is the powerful myth of Utzon, the misunderstood architectural genius undone by the forces of conservatism, and of a building flawed by subsequent compromise, which has firmly taken root as the subtext in the popular imagination and in most narratives.

This book develops new and innovative methods for understanding the cultural significance of places such as the World Heritage listed Sydney Opera House. By connecting participatory media, visual culture and social value, Cristina Garduño Freeman contributes to a fast-growing body of scholarship on digital heritage and the popular reception of architecture. In this, her first book, she opens up a fresh perspective on heritage, as well as the ways in which people relate to architecture via participation on social media. Social media sites such as YouTube, Pinterest,

Wikipedia, Facebook and Flickr, as well as others, become places for people to express their connections with places, for example, the Sydney Opera House. Garduño Freeman analyses real-world examples, from souvenirs to opera-house-shaped cakes, and untangles the tangible and intangible ways in which the significance of heritage is created, disseminated and maintained. As people's encounters with World Heritage become increasingly mediated by the digital sphere there is a growing imperative for academics, professionals and policy-makers to understand the social value of significant places. This book is beneficial to academics, students and professionals of architecture.

Building a masterpiece explores some of the untold chapters in the long history of the Opera House's gestation, development and completion - the individuals whose careers were made or broken by the Opera House, the companies whose reputations were secured through their association with the building, and the pioneering construction methods, innovative technologies and methodologies developed to meet the demands of its unprecedented design and challenging construction. The workers who built the building, the politicians,

architects and members of the public who championed it and its often beleaguered architect are discussed as is its current world status as a symbol of Australia.

Rise of the Imamba The Creative Company

In this "luminous" (The New York Times) historical novel—perfect for fans of *All the Light We Cannot See* and *The Flamethrowers*—a Swedish glassmaker and a fiercely independent Australian journalist are thrown together amidst the turmoil of the 1960s and the dawning of a new modern era. 1965: As the United States becomes further embroiled in the Vietnam War, the ripple effects are far-reaching—even to the other side of the world. In Australia, a national military draft has been announced and Pearl Keogh, an ambitious newspaper reporter, has put her job in jeopardy to become involved in the anti-war movement. Desperate to locate her two runaway brothers before they're called to serve, Pearl is also hiding a secret shame—the guilt she feels for not doing more for her younger siblings after their mother's untimely death. Newly arrived from Sweden, Axel Lindquist is set to work as a sculptor on the besieged Sydney Opera House. After a childhood in Europe, where the shadow of WWII loomed large, he seeks to reinvent himself in this foreign landscape, and finds artistic inspiration—and salvation—in the monument to modernity that is being constructed on Sydney's Harbor. But as the

nation hurtles towards yet another war, Jørn Utzon, the Opera House's controversial architect, is nowhere to be found—and Axel fears that the past he has tried to outrun may be catching up with him. As the seas of change swirl around them, Pearl and Axel's lives orbit each other and collide in this sweeping novel “ that brings the cultural upheaval of 1960s Australia vividly to life, and readers who appreciate leisurely paced, thoughtful literary fiction will savor each word of this emotional story of two people—and a country—reckoning with their past and future ” (Booklist).

This edited collection provides insight into understanding architecture and urban design as technology. In order to understand how and why we live in built environments, we are in need of a conceptual framework that takes into account what role architecture as technology plays in our being and becoming in the world.

The Phantom of the Opera House Springer Nature

This blistering novel—from the bestselling, Pulitzer Prize – winning author of *The Road*—returns to the Texas-Mexico border, setting of the famed *Border Trilogy*. The time is our own, when rustlers have given way to drug-runners and small towns have become free-fire zones. One day, a good old boy named

Llewellyn Moss finds a pickup truck surrounded by a bodyguard of dead men. A load of heroin and two million dollars in cash are still in the back. When Moss takes the money, he sets off a chain reaction of catastrophic violence that not even the law – in the person of aging, disillusioned Sheriff Bell – can contain. As Moss tries to evade his pursuers – in particular a mysterious mastermind who flips coins for human lives – McCarthy simultaneously strips down the American crime novel and broadens its concerns to encompass themes as ancient as the Bible and as bloodily contemporary as this morning's headlines. *No Country for Old Men* is a triumph.
