Chromecast Audio is a miniature device which

plugs into your speaker so that you can stream music through a Wi-Fi connection. With Chromecast Audio you can cast your favourite music to your home speaker. You can do this from your tablet, laptop or phone. Chromecast Audio works with your devices that you have already, such as tablets and mobile Android devices, iPads and iPhones, Mac and Windows laptops, and Chromebook Pixel. To instantly start playing on the speakers just tap the Cast button from your mobile music applications. You can control the speakers from your phone. You can play, pause, search, queue songs, turn the volume up or down, from wherever you are in the house.

Textbook GIA Publications

Defendant Reginald McKay, a mentally disturbed American who became a "home-grown" Islamic terrorist, poisoned members of a Jewish temple during Passover seder.

After one of the *The Trial Presentation Companion: A Step-by-Step Guide to Presenting Electronic Evidence in the Courtroom*, written by award-winning legal technologist Shannon Lex Bales, is NITA's first-ever, comprehensive how-to manual on running electronic evidence in the courtroom. This face-saving guide will help you and your firm expand your comfort zone in working with all the bits and pieces--laptops, trial presentation software, document cameras, audio-visual components, the puzzling array of cords and cables--that are increasingly essential when presenting electronic evidence in court in the modern era. Checklists and guides are included to help your firm create

technology plan for trial and recognize where opposing firms may attempt less-than-reputable technical tactics, such as burden shifting, to throw a monkey wrench in your trial plan. For the judiciary, the book presents a warts-and-all view of trial technology and discusses reasonable presentation obligations by firms to the court and how the court can ensure more efficient technological processes and fewer problems in the courtroom. Part One, *Trial Presentation in Theory*, is just that: a theoretical explanation, in plain (and often tongue-in-cheek) English, about why expert trial technologists do what they do during pretrial and in court: how to organize and name exhibit files, choose the best software for your needs, build a trial kit of equipment to take to court, comply with the Trial Management Order, develop an effective workflow, cultivate relationships that provide mutual support in court and out, and much more. Part Two, *Trial Presentation in Practice*, shows you, step by illustrated step, how you, too, can bring that same game to your own legal team as you huddle for trial. Even if you don't know an HDMI port from a VGA and have never set up a folder system on your server before, *The Trial Presentation Companion* will show you how, and before you know it, you'll be running the show like you were born to it. This book is suitable for everyone from judges and law firm partners and associates to law students, budding trial technologists, and paralegals.

A Down & Dirty DV Production Audio Wiring GuideHow to wire the most popular audio and video connectors
