History that doesn't suck: Smart, crude, and hilariously relevant to modern life. Those who don't know history are doomed to repeat it. Too bad it's usually boring as sh\*t. Enter *The Captain*, the ultimate storyteller who brings history to life (and to your life) in this hilarious, intelligent, brutally honest, and crude compendium to events that happened before any of us were born. The entries in this compulsively readable book bridge past and present with topics like getting ghosted, handling haters, and why dog owners rule (sorry, cat people). Along the way you'll get a glimpse of Edith Wharton's sex life, dating rituals in Ancient Greece, catfishing in 500 BC, medieval flirting techniques, and squad goals from Catherine the Great. You'll learn why losing yourself in a relationship will make you crazy--like Joanna of Castile, who went from accomplished badass to Joanna the Mad after obsessing over a guy known as Philip the Handsome. You'll discover how Resting Bitch Face has been embraced throughout history (so wear it proudly). And you'll see why it's never a good idea to f\*ck with powerful women--from pirate queens to diehard suffragettes to Cleo-f\*cking-patra. People in the past were just like us--so learn from life's losers and emulate the badasses. The Captain shows you how.

"This book is about the people I met as I crisscrossed Australia by train and plane and L-plated car: the undefeated dreamers

and wild-hearted romantics, the obsessed hobbyists and beautiful failures. It is about heroes and legends, illusions, delusions and hope, and one or two men with shit for brains who ought to be locked up." As anyone who's ever read Mark Dapin's column and features in *Good Weekend* knows, he's an immensely funny, acute and vivid observer of Australian life. In *Strange Country*, he takes us on a journey through a very different Australia - a country that's eccentric, puzzling, big-hearted, small-minded, nostalgic and sometimes just plain mad. From the last travelling boxing tent to feral urban sewer rats to Vietnam Veteran bikies and the annual Parkes Elvis Festival, his writing illuminates the stranger side of Australian life in a travel book like no other.

Global competition, shorter product lifecycles and increasingly demanding customers are creating significant pressures for the creation of innovative organizations. By examining eight case studies in various industry sectors in Europe, Australia, Japan and Thailand, this book provides a qualitative explanation of the complex relationships between innovation capability, e-commerce, sustainable development and new product development. The book explores how organizations develop innovation capability through the application of e-commerce, sustainable development-orientation, and new product development in order to gain competitive advantage. This knowledge will help managers, academics and policy-makers understand “what works, and why and how it works” in creating innovation-driven organizations from an international perspective, thereby providing an integrated approach to innovation management.

The next battlefield that will drive the international competitiveness and business outcomes of organizations is innovation. This book, in a highly readable style, presents success stories of international “best” innovation practice companies, informing managers and management researchers “what works, why and how it works” in creating innovative organizations. I strongly recommend it to managers, researchers and lecturers in innovation.” Dr John Marshall Director, Orbital Engine Corporation Limited Chair, Industry Advisory Board, Centre for Global Innovation and Entrepreneurship The University of Melbourne “Managers require knowledge on how to create new products, and how to identify and capitalize on opportunities to innovate. Sustainability has clearly begun to assert itself as a driver for innovation. This book justifies the need for continuous innovation based on qualitative evidence from several “best” practice innovative organizations in Australia, Europe and Asia that have effectively integrated sustainable development, e-commerce and new product development in their pursuit of innovation capability. This book demystifies the misconception of innovation as a technically-driven strategy and argues that innovation is the driving force for future survival of organizations. I strongly recommend the book to practitioners and academics.” Jim Landau CEO, Telatid

Pty Ltd Chair, The Executive Connection “Innovation is a complex process, one easily identified as being of critical importance for organizational success, yet not easily understood and managed. The book provides a good balance between rigor and relevance. Terziovski and his co-authors have developed easy-to-read case studies which have practical application at every level of the organization, and are theoretically ground in the innovation literature. I highly recommend this book to managers, professors and researchers.” Graeme Cocks Co-author of First XI

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.
