This book brings together the latest thinking in Strategic
Environmental Assessment (SEA) and considers the key question of
whether the processes are having a positive impact on strategic
decision making, both in Europe and worldwide. As governments
move to develop green agendas, the book explores the challenges
of working within national systems, as well as the strengths and
weaknesses of sector-specific SEA. The importance of stakeholder
engagement is considered, as is the question of how to turn
NIMBYs into WIMBYs – that is, creating positive reasons to
encourage development and allow local stakeholders to profit. In
assessing ways in which the practice of SEA can provide a new
agenda for the 21st Century, the chapters explore current and
emerging approaches, procedures and methods, along with ways in
which SEA can be linked with other planning tools. The role of
research and academia is considered, and the book looks beyond
the current status of SEA to address the question of how
practitioners can capitalise on the potential of SEA to become
integrated into high-level policy as a key element of climate change
mitigation strategies. Each chapter is written by internationally
renowned authors and based on many years of experience in the
field. The book will be essential reading for forward-thinking
practitioners and students of SEA.

Since becoming editor-in-chief in 2009 Thomas Fischer has
overseen the publication of 22 issues of the Journal of
Environmental and Policy Management. This wide-ranging and
thought-provoking volume presents a selection of papers from this
period. A number of these papers discuss the topics of the journal's
special issues. The others offer various international and
comparative perspectives on the development and implementation
of environmental assessment (EA) and strategic environmental
assessment (SEA). By drawing on the expertise of a number of
global experts, this comprehensive volume considers the
challenges, successes and progress of EA/SEA policy and
management since 2009. This volume is perfect for students and
researchers interested in environmental policy and its
implementation and management.
