Multisegmental Foot and Ankle Motion Analysis After Hallux ...

Human motion analysis or gait analysis is
used throughout the country and the world
in clinics for pre-surgical planning and
postsurgical follow-up. This work presents
the basic and advanced clinical applications
and opportunities in foot and ankle motion
analysis in both pediatric and adult cases. It
also introduces the technological advances.

Analysis: Clinical ...

Gait and Motion Analysis Physicians may request a gait and motion analysis to evaluate how a patient ' s foot and ankle movements deviate from normal movement. Froedtert & the Medical College of Wisconsin operates the Human Motion Analysis Laboratory (" Gait Lab ") in collaboration with Marquette University.

Foot and Ankle Motion Analysis Using Dynamic Radiographic ...

The foot and ankle is made up of the twenty-six individual bones of the foot, together with the long-bones of the lower limb to form a total of thirty-three joints. 1 Although frequently referred to as the ' ankle joint ' , there are a number of articulations which facilitate motion of the foot. The ankle joint complex is made up of the talocalcaneal (subtalar), tibiotalar (talocrural) and transverse-tarsal (talocalcaneonavicular) joint.
