Over the past decade, great strides have been taken in developing methodologies that can treat more and more complex nano- and nano-bio systems embedded in complex environments. Multiscale Dynamics Simulations covers methods including DFT/MM-MD, DFTB and semi-empirical QM/MM-MD, DFT/MMPOL as

well as Machine-learning approaches to all of the above. Focusing on key methodological breakthroughs in the field, this book provides newcomers with a comprehensive menu of multiscale modelling options so that they can better chart their course in the nano/bio world.

Little, Brown Management Information Systems provides comprehensive and integrative coverage of essential new technologies, information system applications, and their impact on business models and managerial decision-making in an exciting and interactive manner. The twelfth edition focuses on the major changes that have been made in information technology over the past two

years, and includes new opening, closing, and Interactive Session cases.

Management Information Systems Cambridge University Press

Fair Play in Sport presents a critical re-working of the classic ideal of fair play and explores its practical consequences for competitive sport. By linking general moral principles and practical cases, the book develops a contemporary theory of fair play. The book examines many of the key issues in the ethics of sport, including: * fairness and justice in sport * moral and immoral interpretation of 'athletic performance' * what makes a 'good competition' * the key values of competitive sport. The notion of fair play is integral to sport as we know and experience it, and is

commonly seen as a necessary ethos if competitive sport is to survive and flourish. Fair Play in Sport provides an invaluable guide to the subject for all those with an interest in ethics and the philosophy of sport.

Beer is a beverage with more than 8000 years of history, and the process of brewing has not changed much over the centuries. However, important technical advances have allowed us to produce beer in a more sophisticated and efficient way. The proliferation of specialty hop varieties has been

behind the popularity of craft beers seen in the past few years around the world. Craft brewers interpret historic beer with unique styles. Craft beers are undergoing an unprecedented period of growth, and more than 150 beer styles are currently recognized.

Special Air Warfare and the Secret War in Laos DIANE Publishing

This brand new guide assists students, interns and residents in developing a functional understanding of the set-up, workings and interpretation of ECGs Step-by-step graphics and short, bite-sized explanations Covers all major cardiac abnormalities including hypertrophy, arrhythmias, conduction blocks, and pre-excitation syndromes Begins with a section on

physiology of the heart and the basic set up of ECG recording Features top tips on what to look for, complete with illustrated examples Supported by a companion website featuring additional practice tracings **AN INTRODUCTION TO ASTROPHYSICS**

Cambridge University Press This invaluable book, now in its second edition, covers a wide range of topics appropriate for both undergraduate and postgraduate courses in astrophysics. The book conveys a deep and coherent understanding of the stellar phenomena, and basic astrophysics of stars, galaxies, clusters of galaxies and other heavenly bodies of interest. Since the first appearance of the book in 1997, significant progress has been made in different

branches of Astronomy and Astrophysics. The second edition takes into account the developments of the subject which have taken place in the last decade. It discusses the latest introduction of L and T dwarfs in the Hertzsprung-Russel diagram (or H-R diagram). Other developments discussed pertain to standard solar model, solar neutrino puzzle, cosmic microwave background radiation, Drake equation, dwarf galaxies, ultra compact dwarf galaxies, compact groups and cluster of galaxies. Problems at the end of each chapter motivate the students to go deeper into the topics. Suggested readings at the end of each chapter have been complemented.

From the bestselling author of
The Bomber Mafia: discover
Malcolm Gladwell's
breakthrough debut and explore
the science behind viral trends in
business, marketing, and human
behavior. The tipping point is

that magic moment when an idea,
trend, or social behavior crosses a
threshold, tips, and spreads like
wildfire. Just as a single sick
person can start an epidemic of
the flu, so too can a small but
precisely targeted push cause a
fashion trend, the popularity of a
new product, or a drop in the
crime rate. This widely acclaimed
bestseller, in which Malcolm
Gladwell explores and brilliantly
illuminates the tipping point
phenomenon, is already changing
the way people throughout the
world think about selling
products and disseminating ideas.
“A wonderful page-turner about a
fascinating idea that should affect
the way every thinking person
looks at the world.” —Michael
Lewis

American Machinist

During the early stages of
helicopter development,
when helicopters were able
to lift just slightly more than
their own weight, the
military services were
eagerly seeking to obtain a

variety of larger, more useful Korea. As Lieutenant helicopters. The youthful General Gerald C. Thomas helicopter industry expressed stated: "Indeed, the optimism, although at times helicopter gave clear unrealistic, in its ability to evidence, from its first meet the military tactical employment, that a requirements. The major advance in combat development of the was at hand." This history, helicopter program within which traces the the Marine Corps was development of helicopters sparked by the foresight and in the Marine Corps from imagination of the officers of 1946 to 1962, offers a tribute the period. While early to the creative vision and helicopters provided planning of a handful of stepping stones for an Marine officers who orderly progression of the conceived of the vertical program, the slowness of the assault concept in technical advances and the amphibious operations at a periods of financial austerity time when suitable aircraft to after World War II and make it work did not exist. Korea prevented the Marine The story of the subsequent Corps from developing the struggle to procure and vertical envelopment develop those aircraft, to concept as rapidly as refine a doctrine for their desired. The program gained employment, and to interest and momentum, familiarize the Marine Corps however, as a result of the with their use is an success of helicopters in interesting and vital part of

modern Marine Corps history. The documentary basis for this monograph was primarily the official records of the Marine Corps and Navy Department, but considerable use was made of interviews and correspondence with key individuals involved in all phases of helicopter development.

Described as "Who owns whom, the family tree of every major corporation in America, " the directory is indexed by name (parent and subsidiary), geographic location, Standard Industrial Classification (SIC) Code, and corporate responsibility.

Microwave Journal

A reference work describing every major aeroplane engine

manufacturer throughout the world, together with its products, from the pioneering days to the recent engines. Each aero engine is within its technological and historical context with power plants of all nationalities illustrated. The human element of the story is also included with the personal struggles that resulted in such notable engines as the Rolls-Royce Merlin and the Pratt & Whitney P6 being related.

Brewing and Craft Beer

This work is a comprehensive, heavily illustrated history of the many flying boats and amphibious aircraft designed and built in the United States.

It is divided into three chronological sections: the early era (1912–1928), the golden era (1928–1945), and the post-war era (1945–present), with historical overviews of each period.

Within each section, individual aircraft types are listed in alphabetical order by manufacturer or builder, with historical background,

technical specifications, drawings, and one or more photographs. Appendices cover lesser known flying boat and amphibian types as well as various design concepts that never achieved the flying stage.
