The Siren and Selected Writings Princeton University Press

This selection of lectures, essays and speeches by Lord Judge, nearly all written when he was Lord Chief Justice of England and Wales, brings together his analysis of a wide range of topics which underpin the administration of justice and the rule of law. Apart from a few personal reflections, the discussion ranges from the development of our constitutional arrangements to matters of continuing constitutional uncertainty, with observations about different aspects of the court process and the discharge of judicial responsibilities. Based on Lord Judge's experience in the law and a deep interest in history, this selection offers sometimes uncomfortable, sometimes amusing, but always stimulating reading, and will provoke thoughtful reflection on and better understanding of the arrangements by which we are governed and the practical application of the rule of law.

Der Leopard Harvard University Press

This volume aims to investigate the complex theme

of social mobility in medieval Italy both by comparing Italian research to contemporary international studies in various European contexts, and by analysing a broad range of themes and specific case studies. Medieval social mobility as a European phenomenon, in fact, still awaits a systematic analysis, and has seldom been investigated iuxta propria principia in social, political and economic history. The essays in the book deal with a number of crucial problems: how is social mobility investigated in European and Mediterranean contexts? How did classic mobility channels such as the Church, officialdom, trade, the law, the lordship or diplomacy contribute to shaping the many variables at play in late medieval societies, and to changing – and challenging – inequality? How did movements and changes in social spaces become visible, and what were their markers? What were the dynamics at the heart of the processes of social mobility in the many territorial contexts of the Italian peninsula?

The Leopard, published posthumously in 1958, was one of the most important works of fiction to appear in the Italian language in the twentieth century. Between 1925 and 1930, its author, Giuseppe Tomasi di Lampedusa, wrote a number of letters to his cousins Casimiro and Lucio Piccolo in which he describes his travels around Europe (London, Paris, Zurich, Berlin). The letters, here published in English for the first time, display much of Lampedusa's distinctive style present in his later work: not only the razor-sharp introspection, but also a wicked sense of humour, playful in its description of the comédie humaine.

Essays in Modern Italian Literature from Verga to Pasolini Alma Books

This book deals with a topic that is gaining increasing critical attention, the literature of nonsense and absurdity. The volume gathers together twenty-one essays on various aspects of literary nonsense, according to criteria that are deliberately inclusive and eclectic. Its purpose is to offer a gallery of "nonsense practices" in literature across periods and countries, in the conviction that important critical insights can be gained from these juxtapositions. Most of the cases presented here deal with linguistic nonsense, but in a few instances the nonsense operates at the higher level of the interpretation of reality on the part of the subject—or of the impossibility thereof. The contributors to the volume are established and younger scholars from various countries. Chronologically, the chapters range widely from Dante to Václav Havel, and offer a large span of national literatures (Czech, English, Finnish, French, German, Italian, Japanese) and literary genres (poetry, prose, and drama), inviting the readers to trace their own pathway and draw their own lines of connection. One point that emerges with particular force is the notion that what distinguishes literary nonsense is its somehow "regulated" nature. Literary nonsense thus sounds like a deliberate, last-ditch attempt to snatch order from the jaws of chaos—the speech of the "Fool" as opposed to the tale told by an idiot. It is this kind of post-Derridean retrieval of choice as the defining element in semantic transactions which is perhaps

the most significant insight bequeathed by the study of nonsense to the analysis of poetry and literature in general.

From the atmospheric recollections of the Palazzo Lampedusa and the Palazzo Filangeri Cuto at the turn of the twentieth century in 'Childhood Memories' to the delightful fable 'The Siren', from the gently humorous, bitter-sweet tones of 'Joy and the Law' to 'The Blind Kittens' - the first chapter of what was intended to be a sequel to *The Leopard* - this volume showcases Lampedusa's unparalleled observational powers and narrative skills.

From the Ice Age to the Cold War and beyond, from Reykjavik to Riga, from Archimedes to Einstein, Alexander to Yeltsin, here between the covers of a single volume Norman Davies tells the story of Europe, East and West, from prehistory to the present day. The book's absorbing narrative lays down the chronological and geographical grid on which the dramas of European history have been played out. It zooms in from the distant focus of Chapter One, which explores the first five million years of the continent's evolution, to the close focus of the last two chapters, which cover the twentieth century at roughly one page per year. In between, Norman Davies presents a huge and sweeping canvas packed with fascinating detail, analysis, and anecdote. Alongside Europe's better-known stories - human, national, and continental - he brings into focus areas often ignored or misunderstood, remembering the stateless nation as well as the nation-state. Minority communities, from heretics and lepers to Jews, Romanies, and Muslims have not been forgotten. This masterly history reveals not only the rich variety of Europe's past but also the many and rewarding prisms through which it can be viewed. Each chapter contains a selection of telephoto 'capsules', illustrating narrower themes and topics that cut across the chronological flow. Davies then concludes with a wide-angle 'snapshot' of the whole continent as seen from one particular vantage point. The overall effect is stunning: a kind of historical picture album, with panoramic tableaux interspersed by detailed insets and close-ups. Never before has such an ambitious history of Europe been attempted. In range and ambition, the originality of its structure and glittering style, Norman Davies's Europe represents one of the most important and

illuminating history books to be published by Oxford. Time Capsules 201 fascinating articles interspersed throughout the narrative focus on incidents or topics as various as *The Iceman of the Alps*, *Erotic Graffiti at Pompeii*, *Stradivarius*, and *Psychoanalysing Hitler*. Each capsule can be tasted as a separate self-contained morsel; or can be read in conjunction with the narrative into which it is inserted. Snapshots 12 panoramic overviews across the changing map of Europe freeze the frames of the chronological narrative at moments of symbolic importance, such as Knossos 1628 BC, Constantinople AD 330, and Nuremberg 1945. A fully illustrated history incorporates over 100 superbly detailed maps and diagrams, and 32 pages of black and white plates. Cambridge University Press

Travellers have always been thrilled by the sight of citrus in Italy, where dark leaves and bright fruit seem to charge the landscape, making the trees symbols of a sun-soaked, poetic vision of the country. Citrus also holds a special place in the Italian imagination, and in *The Land Where Lemons Grow*, Helena Attlee sets out to explore its curious past and its enduring resonance in Italian culture. Building on a life of travel and work in Italy, she undertakes a journey encompassing the sticky streets of Ivrea during the Battle of Oranges, the comfortable gardens of Tuscany's villas and a magic triangle of land in Sicily, where the best blood oranges in the world grow in the shadow of a volcano. She maps the citron's long migration from the foothills of the Himalayas to the shores of southern Italy, traces the bitter juice of Seville oranges through ancient Roman and Renaissance cookery books, exposes early manifestations of the Mafia during the nineteenth-century citrus boom, and laments the loss of landscapes shaped by citrus cultivation. The book is a celebration of the unique qualities of Italy's citrus fruit, from bergamot that will thrive only on a short stretch of coastline, to Calabria's Diamante citrons, vital to Jews all over the world during the celebration of Sukkoth. *The Land Where Lemons Grow* is a heady mixture of travel writing, history, horticulture and art; a unique journey

through Italy's cultural, culinary and political past. Helena Attlee is the author of four books about Italian gardens, and others on the cultural history of gardens around the world. Helena is a Fellow of the Royal Literary Fund and has worked in Italy for nearly 30 years.

Written by Lampedusa's adopted son, Giacchino Lanza Tomasi, this new illustrated biography - which includes a wealth of unpublished pictures from Lampedusa's private albums and documents from his family archive, as well as a foreword by Lampedusa biographer David Gilmour - explores all the people and places that were dear to the great Sicilian master and are essential for a fuller understanding of his work. House of Dark Shadows When the Kings move from L.A. to a secluded small town, fifteen-year-old Xander is beyond disappointed. He and his friends loved to create amateur films . . . but the tiny town of Pinedale is the last place a movie buff and future filmmaker wants to land. But he, David, and Toria are captivated by the many rooms in the old Victorian fixer-upper they moved into—as well as the heavy woods surrounding the house. They soon discover there's something odd about the house. Sounds come from the wrong directions. Prints of giant, bare feet appear in the dust. And when David tries to hide in the linen closet, he winds up in locker 119 at his new school. Then the really weird stuff kicks in. They find a hidden hallway with portals leading to far-off places—in long-ago times. Xander is starting to wonder if this kind of travel is a teen's dream come true . . . or his worst nightmare. *Watcher in the Woods Pretending*

everything's all right is harder than it sounds. But the Kings know that even if they told the truth about the bizarre things happening in their house, no one would believe them. They're hyper-focused on rescuing their lost family member before anyone finds out what's going on. But when a stranger shows up to take their house, their options start dwindling fast. Why would he be so interested in a run-down old place? And what secret is he hiding—just as he hides the scars that crisscross his body? The mystery gets stranger with each passing day. Will the Kings be able to find a way to harness the house's secrets and discover who is watching their every move before another gets snatched into an unknown world? Gatekeepers The Kings have been in the creepy old place, their new home, for only a few days, but they've experienced enough terror to last a lifetime. And the mystery is growing even more baffling. Shadowy and shifting, the big house conceals doors into other worlds that blur the line between memories and dreams—and the slightest misstep can change history forever. At least, that's if they believe the trembling old man who shows up claiming to know them. "There's a reason you're in the house," he tells them. "As gatekeepers, we must make sure only those events that are supposed to happen get through to the future." The problem is that horrors beyond description wait on the other side of those gates. As if that weren't enough, the Kings are also menaced by sinister forces on this side—like the dark, ancient stranger Taksidian, who wants them out. Xander, David, and Toria must venture beyond the gates to save their missing mother—and discover how truly high the stakes have become.

How the Fight Over Birth Control Transformed American Catholicism Pantheon

On July 29, 1968, Pope Paul VI ended years of discussion and study by Catholic theologians and bishops by issuing an encyclical on human sexuality and birth control entitled *Humanae Vitae*: "On Human Life." That

document, which declared that "each and every marriage act must remain open to the transmission of life," lead to widespread dissent and division within the Church, particularly in the United States. The divide that *Humanae Vitae* opened up is still with us today. Mark Massa argues that American Catholics did not simply ignore and dissent from the encyclical's teachings on birth control, but that they also began to question the entire system of natural law theology that had undergirded Catholic thought since the days of Aquinas. Natural law is central to Catholic theology, as some of its most important teachings on issues such as birth control, marriage, and abortion rest on natural law arguments. Drawing inspiration from Thomas Kuhn's classic work *The Structure of Scientific Revolutions*, Massa argues that *Humanae Vitae* caused a paradigm shift in American Catholic thought, one that has had far-reaching repercussions. How can theology—the study of God, whose nature is imagined to be eternal and unchanging—change over time? This is the essential question that *The Structure of Theological Revolutions* sets out to answer. Massa makes the controversial claim that Roman Catholic teaching on a range of important issues is considerably more provisional and arbitrary than many Catholics think. [Philosophy from Socrates to Adorno](#) Oxford University Press Facing up to the social changes in nineteenth century Italy, an elderly aristocrat arranges a marriage between his daughter and a wealthy merchant *Nonsense and Other Senses* Harvill Secker Focusing on nineteenth- and twentieth-century Italian literature, Gian-Paolo Biasin explores a series of challenges posited for literary criticism by the success of semiotics, testing theoretical concepts not so much on theoretical grounds as in their practical application to literary texts from the high Romantic lyric of Ugo Foscolo to the postmodern, cosmicomic tales of Italo Calvino. Europe Icaria Editorial The quest for cost savings in hospitals and health

systems too often prompts leaders to rush to make major cuts in the largest budget line item: staffing and labor costs. Evidence shows, though, that cutting labor expenses, especially in nursing, negatively impacts both quality of care and overall profitability. Faced with cutting costs while continuing to provide extraordinary patient care, nurses at Children's Hospital of Philadelphia (CHOP) decided to pave a different path. In the process, they created a new model of bedside-driven fiscal responsibility. Nursing-Led Savings shows organizational leaders at all levels how to develop and implement a robust, sustainable plan that eliminates waste and streamlines processes in everyday clinical work. This strategy involves:

- Educating frontline staff on the importance of financial stewardship
- Using a structured improvement approach to execute cost savings at the bedside
- Engaging Nursing Shared Governance councils in implementation and oversight
- Prioritizing non-labor expense reduction
