This book is about the gender dimensions of natural resource

exploitation and management, with a focus on Asia. It explores

the uneasy negotiations between theory, policy and practice that

are often evident within the realm of gender, environment and

natural resource management, especially where gender is

understood as a political, negotiated and contested element of

social relationships. It offers a critical feminist perspective

on gender relations and natural resource management in the

context of contemporary policy concerns: decentralized

governance, the elimination of poverty and the mainstreaming of

gender. Through a combination of strong conceptual argument and

empirical material from a variety of political economic and

ecological contexts (including Cambodia, China, Indonesia,

Malaysia, Nepal, Thailand and Vietnam), the book examines gender-

environment linkages within shifting configurations of resource

access and control. The book will serve as a core resource for

students of gender studies and natural resource management, and

as supplementary reading for a wide range of disciplines

including geography, environmental studies, sociology and

development. It also provides a stimulating collection of ideas

for professionals looking to incorporate gender issues within

their practice in sustainable development. Published with IDRC."

On August 17 – 18, 1942, 211 men of the US Marine Corps' 2nd Raider Battalion conducted a daring

amphibious raid on the Japanese-occupied Makin Island in the South Pacific. This ambitious but flawed

operation was intended to divert Japanese reinforcements bound for Guadalcanal, over 1,000 miles to the

southwest, in the wake of the US landings there ten days earlier; the Raiders were to destroy the seaplane base

and radio station, take prisoners, and collect intelligence. Although yielding limited results, it was to be an

invaluable test of the innovative training and tactics employed by the Raiders, and a crucial boost to national

morale at this difficult stage in the war. Featuring specially commissioned full-colour artwork and expert

analysis, this gripping account of the fateful Makin Raid tells the whole story, from the plan's conception to

its troubled execution and aftermath.

islands has emotional content far beyond any material significance because giving way on the island issue to Japan

would be considered as once again compromising the sovereignty over the whole Korean peninsula. For Japan, the

Dokdo issue may lack the same degree of strategic and economic values and emotional appeal as the other two

territorial disputes that Japan has had with Russia and the two Chinas – namely the Northern Territories/Southern

Kurile Islands and the Senkaku Islands, respectively. Nevertheless, fishing resources and the maritime boundary issues

became highly salient with the introduction of UNCLOS. Also, the legal, political, and economic issues surrounding

Dokdo are all intertwined with Japan's other territorial disputes to the extent that concessions of sovereignty on any

of these island disputes could jeopardize claims or negotiations concerning the rest. South Korea and Japan have

forged a deeper diplomatic and economic partnership over the past decade. A new spirit of partnership after the

landmark joint declaration of 1998 culminated in the successful co-hosting of the World Cup 2002. At the end of 2003

the two neighbors began to negotiate an FTA to further strengthen their already close economic ties. South Korea's

decades-long embargo on Japanese cultural products has now been lifted, while a number of South Korean pop stars

are currently sweeping across Japan, creating the so-called "Korean Wave" fever. A pragmatic calculation of

national interests would thus suggest cooperative behavior.

Tariff Act of 1930 Good Press

Channel Islands National Park, immediately adjacent to millions of southern Californians, sees relatively few

visitors because of the logistical and physical challenges involved in visiting any of the islands. This guidebook

provides detailed advice on planning a trip, what essential items to bring, expected weather conditions,

sketches of the natural and cultural history of the island, and detailed descriptions of possible walks on the

island, ranging from strolls of a few minutes to overnight backpack trips. The author describes several routes

that are not listed among the official maintained trails on the island. Routes are rated by relative difficulty and

safety measures and skill levels are described for the prospective visitor.

From the Earliest Ages to the Present Time (Complete Edition) Trafford Publishing

Prepare yourself for discoveries and new adventures with this incredible book about the true origin of wanderlust. This

edition forms a complete history of the earliest start and progress of navigation, discovery, and commerce, by sea and

land, from the earliest ages to the early 19th century. First part of the work covers voyages and travels of discovery in the

middle ages; from the era of Alfred, King of England, in the ninth century to that of Don Henry of Portugal at the

commencement of the fourteenth century. Second part deals with general voyages and travels chiefly of discovery;

from the era of Don Henry, in 1412, to that of George III. in 1760. The rest of the work has some particular voyages

and travels arranged in systematic order, Geographical and Chronological, and studies voyages during the era of

George III conducted upon scientific principles, by which the Geography of the globe has been nearly perfected.

The Concise Garland Encyclopedia of World Music Xlibris Corporation

Tropical East Asia is home to over one billion people and faces massive human impacts from its rising population and

rapid economic growth. It has already lost more than half of its forest cover to agriculture and urbanization, and has

the highest rates of deforestation and logging in the tropics. Habitat loss, coupled with hunting and the relentless trade

in wildlife products, threatens all its large and many of its smaller vertebrates. Despite these problems, the region still

supports an estimated 15-25% of global terrestrial biodiversity and a growing environmental awareness means that it is

no longer assumed that economic development justifies environmental damage, and no longer accepted that this trade-

off is inevitable. Effective conservation action now depends on integrating a clear understanding of the ecological

patterns and processes in the region with the varied needs of its human population. This third edition continues to

provide an overview of the terrestrial ecology of Tropical East Asia: from southern China to Indonesia, and from

Bhutan and Bangladesh to the Ryukyu Islands of Japan. It retains the balance between compactness and

comprehensiveness of the previous editions, and the even-handed geographical treatment of the whole region, but it

updates both the contents and the perspective. Approximately one third of the text is new or greatly modified,

reflecting the explosion of new research in the region in the last few years and the increasing use of new tools,

particularly from genomics and remote sensing. The change in perspective largely reflects the growing realization that

we are in a new epoch, the Anthropocene, in which human activities have at least as large an influence as natural

processes, and that stopping or reversing ecological change is no longer an option. This does not mean that

biodiversity conservation is no longer possible or worthwhile, but that the biodiverse future we strive for will inevitably

be very different from the past. The Ecology of Tropical East Asia is an advanced textbook suitable for senior

undergraduate and graduate level students taking courses on the terrestrial ecology of the East Asian tropics, as well as

an authoritative regional reference for professional ecologists, conservationists, and interested amateurs worldwide.

THE EBOOK BESTSELLER Perfect for fans of Lucinda Riley, Dinah Jefferies, Victoria Hislop and

Lucy Foley. Two great loves. One shattering betrayal. A war that changes everything. ***** 'Island

in the East is a stunner' Kate Furnivall 'Exotic and mysterious - I was gripped' Dinah Jefferies 'A moving,

stirring love story' Rachel Rhys 'Evocative, absorbing. . . A rich and satisfying read' Gill Paul 'It becomes

impossible to put this book down' Kate Riordan ***** Singapore, 1897 Harriet and Mae Grafton

are twenty-year-old identical twins born from a scandalous affair. They grew up in India slighted by gossip

and ostracised from polite society. They had each other and that was enough. But when their wealthy

benefactor sends them to Singapore, they meet the mysterious Alex Blake and their relationship fractures with

devastating consequences. 1941 Ivy Harcourt is posted to wartime Singapore amid the looming threat of

Japanese invasion. Ivy knows the island will be a far cry from war-torn London, but she is totally unprepared

for what awaits her: strangers from her grandmother Mae's past, an unstoppable love affair and a shattering

secret that's been waiting to be uncovered . . . Vivid, authentic and utterly beautiful - with a sizzling love affair

playing out against sisterly rivalry and epic family drama - Island in the East is romantic historical fiction at its

very best. More praise for Jenny Ashcroft: 'Beautifully described . . . A moving love story' Tracy Rees 'A great

read.' Judith Lennox 'A summer must-read' Red 'Love, sisterly rivalry and betrayal are themes in this epic

tale' My Weekly 'Brilliant; everything romantic historical fiction should be.' Nicola Cornick 'Absolutely

brilliant' Kerry Fisher 'Completely entrancing . . . Perfect escapism, beautifully written.' Emma Rous

'Evocative, lush and beautifully written, Island in the East is a gripping read.' Nikola Scott 'First-class writing,

brilliant characters, fascinating locations and gripping plots' Tracy Buchanan 'Exquisitely written . . .

unputdownable and unforgettable' Iona Grey 'A wonderful novel, full of mystery that kept me gripped until

the end' Rachel Burton

Report of the Forest Commissioner of the State of Maine e-artnow

The Fourth Bear Hug is a continuation of the stories in The Bear Hug, The Final Bear Hug, and The Third Bear Hug.

The story in the latter book concludes with Deborah Czermak dying and John Czermak recovering. However,

Andrei's brother, Alexei Pushkin, is determined to kill John since he is convinced that John was responsible for the

deaths of his brother and two nephews. However, Alexei is unsuccessful in killing Professor Czermak. John then

returns to work at Clemson University. The story in The Fourth Bear Hug begins after Czermak retires from Clemson,

sells his two homes, and moves to Colorado. He then starts working as a part-time professor at the University of

Colorado and shares an office with a visiting professor from Moscow. He and Professor Lara Medvedev start traveling

together to meetings, and a loving relationship develops. They attend a conference in Sweden followed by going to

Moscow so John can meet Lara's parents. During this time Czermak visits a good friend at the Academy of Sciences

where they go to the roof of a tall academy building to take some pictures. Then Alexei shows up and tries to push

Czermak off the building, but instead Alexei falls to his death. Since John now thinks that no one is trying to murder

him, he asks Lara to marry him. She happily agrees. A few days later they have a wedding reception at Lara's

parents' home. The party has a tragic ending. Globe-trotters should especially enjoy reading about some of the

author's travels to various places in the world.

Combined with History and Astronomy; Designed for Intermediate Classes in Public and Private

Schools Hachette UK

This volume offers a comprehensive history of the Mount Desert Island Biological Laboratory

(MDIBL), one of the major marine laboratories in the United States and a leader in using marine

organisms to study fundamental physiological concepts. Beginning with its founding as the Harpswell

Laboratory of Tufts University in 1898, David H. Evans follows its evolution from a teaching facility

to a research center for distinguished renal and epithelial physiologists. He also describes how it

became the site of major advances in cytokinesis, regeneration, cardiac and vascular physiology,

hepatic physiology, endocrinology and toxicology, as well as studies of the comparative physiology of

marine organisms. Fundamental physiological concepts in the context of the discoveries made at the

MDIBL are explained and the social and administrative history of this renowned facility is described.
