This book is the first dedicated volume of academic analysis on the monumental work of Elena Ferrante, Italy's most well-known contemporary writer. The Works of Elena Ferrante: Reconfiguring the Margins brings together the most

exciting and innovative research on Ferrante's treatment of the intricacies of women's lives, relationships, struggles, and dilemmas to explore feminist theory in literature; questions of gender in twentieth-century Italy; and the psychological and material elements of marriage, motherhood, and divorce. Including an interview from Ann Goldstein, this volume goes beyond "Ferrante fever" to reveal the complexity and richness of a remarkable oeuvre.

Corrado Alvaro's

Fear in the World was published a decade before Orwell's 1984, but is not well known outside Italy, perhaps because of the timing of the publication just before the Second World War. Alvaro had visited the Soviet Union as a journalist, but was probably motivated to write this dystopian novel by aspects of modernity that concerned him, particularly the use of fear for political purposes which was not afflicting Russia alone. He was interested in the psychology of fear and the extent to which individuals

and the crowd participate in their own regimentation. The names of countries, cities and leading political figures such as Stalin are never referred to, but as in the works of Orwell they are clearly identifiable from their descriptions: the author was writing in a Fascist country against a Fascist censor and had to cut his cloth accordingly. This is a dark novel, not quite as dark as 1984, but it is more claustrophobic. The feeling of inevitability is there from the first page, and it is experienced as we experience real life. The imagined truth takes us closer to where we really are. The travails of the love affair at the core of this novel quite possibly arise from perceptions that

the regime exploits in a quite ad hoc manner. And it leads the reader through an extraordinary sequence of events and observations which encompass a vast range of emotions and ideas expressed in a unique prose style. The modern Leviathan appears to be a well-oiled machine, but towards the end it becomes clear that this is merely an appearance of efficiency and omniscience, but appearances can be powerful. Alvaro is particularly interested in how the state uses quasireligious mechanisms and rituals to assert its power. The central character returns to the country after a long period abroad, and sees things initially through foreign eyes, living a life similar to the one Alvaro did when in

Russia. He is not a natural rebel, and very much wants to fit in, but he finds this difficult to achieve. The regime boasts that it has an ally in history, but destiny is elusive, however much the characters feel that they are driven by it.

2012. L'apocalisse è vicina e tra le calli di una romantica Venezia si aggira un ragazzo biondo, così bello da non sembrare umano. Jude è un abitante di Aurora, un mondo popolato dai Luminosi, creature perfette simili agli dèi, ed è venuto sulla Terra in missione per conto del padre. Il potente Damon gli ha ordinato di trovare un antico codice Maya, l'unico strumento in grado di salvare l'umanità dalla catastrofe che è stata profetizzata. Durante le sue ricerche Jude si imbatte in Viola, una studentessa ostinata e razionale il cui passato è legato drammaticamente al codice misterioso. Sullo sfondo della laguna di

Sitting at his desk, Bernardo Soares imagined himself free forever of Rua dos Douradores, of his boss Vasques, of Moreira the book-keeper, of all the other employees, the errand boy, the post boy, even the cat. But if he left them all tomorrow and discarded the suit of clothes he wears, what else would he do?

Because he would have to do something. And what suit would he wear?

Because he would have to wear another suit. A self-deprecating reflection on the sheer distance between the loftiness of his feelings and the humdrum reality of his life, *The Book of Disquiet* is a classic of existentialist

literature.

Steps forward in mathematics often reverberate in other scientific disciplines, and give rise to innovative conceptual developments or find surprising technological applications.

This volume brings to the forefront some of the proponents of the mathematics of the twentieth century, who have put at our disposal new and powerful instruments for investigating the reality around us. The portraits present people who have impressive charisma and wide-ranging cultural interests, who are passionate about defending the importance of their own research, are sensitive to beauty, and attentive to the social and political problems of their times. What we have sought to document is mathematics' central position in the culture of our day. Space has been made not only for the great mathematicians but also for literary texts, including contributions by two apparent interlopers,

Robert Musil and Raymond Queneau, for whom mathematical concepts represented a valuable tool for resolving the struggle between 'soul and precision.'

Beginning with his experiences as a prisoner of war, Moltmann anchors his reflections in a theology of life - and the Spirit as elemental renewer of life - which links biblical manifestations to contemporary ones, hope to holiness, creation to community, and politics to prayer. In the Spirit we embrace the presence of God, but we also embrace community with people and all living things.
