Leading and emerging, early career scholars in Classical Reception Studies come together in this volume to explore the under-represented area of the Australasian Classical Tradition. They interrogate the interactions between Mediterranean Antiquity and the antipodean worlds of New Zealand and Australia through the lenses of literature, film, theatre and fine art. Of interest to scholars across the globe who research the influence of antiquity on modern literature, film, theatre and fine art,

this volume fills a decisive gap in the literature by bringing antipodean research into the spotlight. Following a contextual introduction to the field, the six parts of the volume explore the latest research on subjects that range from the Lord of the Rings and Xena: Warrior Princess franchises to important artists such as Sidney Nolan and local authors whose work offers opportunities for cross-cultural and interdisciplinary analysis with well-known Western authors and artists.

While designers possess the

creative capabilities of shaping cities, their often-singular obsession with form and aesthetics actually reduces their effectiveness as they are at the mercy of more powerful generators of urban form. In response to this paradox, *Designing Urban Transformation* addresses the incredible potential of urban practice to radically change cities for the better. The book focuses on a powerful question, "What can urbanism be?" by arguing that the most significant transformations occur by fundamentally rethinking concepts, practices, and outcomes. Drawing inspiration from the philosophical movement known as Pragmatism, the book proposes three conceptual shifts for

transformative urban practice: (a) beyond material objects: city as flux, (b) beyond intentions: consequences of design, and (c) beyond practice: urbanism as creative political act. Pragmatism encourages us to consider how we can make deeper and more systemic changes and how urbanism itself can be a design strategy for such transformations. To illuminate how these conceptual shifts operate in vastly different contexts through analysis of transformative urban initiatives and projects in Belo Horizonte, Boston, Cairo, Karachi, Los Angeles, New Delhi, and Paris. The book is a rare integration of theory and practice that proposes essential ways of rethinking city-

Colin Heywood's classic account of childhood from the early Middle Ages to the First World War combines a long-run historical perspective with a broad geographical spread. This new, comprehensively updated edition incorporates the findings of the most recent research, and in particular revises and expands

the sections on theoretical developments in the 'new social studies of childhood', on medieval conceptions of the child, on parenting and on children's literature. Rather than merely narrating their experiences from the perspectives of adults, Heywood incorporates children's testimonies, 'looking up' as well as 'down'. Paying careful attention to elements of continuity as well as change, he tells a story of astonishing material improvement for the lives of children in advanced societies, while showing how the business of preparing for adulthood became more and more complicated and fraught with emotional difficulties. Rich with evocative details of

---

everyday life, and providing the most concise and readable synthesis of the literature available, Heywood's book will be indispensable to all those interested in the study of childhood.
