The definitive history of the military's decades-long investigation into mental powers and phenomena, from the author of Pulitzer Prize finalist *The Pentagon's Brain* and international bestseller *Area 51*. This is a book about a team of scientists and psychics with top secret clearances. For more than forty years, the U.S. government has researched extrasensory perception, using it in attempts to locate hostages, fugitives, secret bases, and downed fighter jets, to divine other nations' secrets, and even to predict future threats to national security. The intelligence agencies and military services involved include CIA, DIA, NSA, DEA, the Navy, Air Force, and Army—and even the Joint Chiefs of Staff. Now, for the first time, New York Times bestselling author Annie Jacobsen tells the story of these radical, controversial programs, using never before seen declassified documents as well as exclusive interviews with, and unprecedented access to, more than fifty of the individuals involved. Speaking on the record, many for the first time, are former CIA and Defense Department scientists, analysts, and program managers, as well as the government psychics themselves. Who did the U.S. government hire for these top secret programs, and how do they explain their military and intelligence work? How do scientists approach such enigmatic subject matter? What interested the government in these supposed powers and does the research continue? Phenomena is a riveting investigation into how far governments will go in the name of national security.

Who has not asked himself at least once whether telekinesis and telepathy are real? But have you ever wondered if there is a place to... learn these skills? Aiden Conner has not excelled at being a normal child, especially since his parents disappeared. But to go from his so-called normal life to ending up in a hidden and secret city whose inhabitants use telekinesis and read minds, to be haunted by a formidable enemy searching for him even before Aiden was born, and to storm into an enemy camp in the heart of modern New York with a pair of fluttering swords? These are things Aiden did not imagine even in his wildest dreams (and he's had some wild ones). But Aiden's greatest challenge will be figuring out the right thing to do, because the telekinesis world he's fallen in love with is at stake and everything depends on him and him alone.

The Secret History of the U.S. Government's Investigations into Extrasensory Perception and Psychokinesis AuthorHouse
Is everything connected? Can we sense what's happening to loved ones thousands of miles away? Why are we sometimes certain of a caller's identity the instant the phone rings? Do intuitive hunches contain information about future events? Is it possible to perceive without the use of the ordinary senses? Many people believe that such "psychic phenomena" are rare talents or divine gifts. Others don't believe they exist at all. But the latest scientific research shows that these phenomena are both real and widespread, and are an unavoidable consequence of the interconnected, entangled physical reality we live in. Albert Einstein called entanglement "spooky action at a distance" -- the way two objects remain connected through time

and space, without communicating in any conventional way, long after their initial interaction has taken place. Could a similar entanglement of minds explain our apparent psychic abilities? Dean Radin, senior scientist at the Institute of Noetic Sciences, believes it might. In this illuminating book, Radin shows how we know that psychic phenomena such as telepathy, clairvoyance, and psychokinesis are real, based on scientific evidence from thousands of controlled lab tests. Radin surveys the origins of this research and explores, among many topics, the collective premonitions of 9/11. He reveals the physical reality behind our uncanny telepathic experiences and intuitive hunches, and he debunks the skeptical myths surrounding them. *Entangled Minds* sets the stage for a rational, scientific understanding of psychic experience.

The history of humankind cannot be charted as a steady linear upward slope but rather as a series of quantum jumps of short duration separated by plateaus of varying duration during which no progress occurred. During these periods of no progress, the revolutionaries who produced the preceding quantum jump pass from the scene, their principles and concepts become concretized as dogma, and a new establishment is born whose sacred duty is the protection of the dogma against the new revolutionaries. The last quantum jump was the scientific revolution of the nineteenth century which laid the groundwork for our present technological civilization, and perhaps more important, also shaped our philosophical view of what is a human being. Since the basis of this scientific revolution was reason, logic, measurement, and total reliance upon the organized senses, the resultant view of the person is that of an automaton, functioning in a clockwork world. The power of this view is evident in the advances made in medical science up until the 1950s. The twin triumphs of sanitation and preventive medicine and the development of the antibiotic concept completely revolutionized the practice of medicine, and by 1950 those of us in the profession were anticipating a new golden age of medicine. But, in fact, the reality has been disaster. The mechanistic view of humanity has led to more and more technological applications of ever increasing complexity and cost and ever decreasing efficiency.

This work was the first sustained philosophical study of psychic phenomena to follow C.D. Broad's LECTURES ON PSYCHICAL RESEARCH, written nearly twenty years earlier. The author clearly defines the categories of psychic phenomena, surveys the most compelling experimental data, and traces their implications for the philosophy of science and the philosophy of mind. He considers carefully the abstract presuppositions underlying leading theories of psychic phenomena, and

he offers bold criticisms of both mechanistic analyses of communication and psychophysical identity theories. In addition, he challenges the received view that experimental repeatability is the paramount criterion for evaluating parapsychological research, and he exposes the deep confusions underlying Jung's concept of synchronicity.

In this study of channeling, earlier called spirit communication or mediumship, Klimo, who teaches at Rosebridge Graduate School in the San Francisco Bay Area, writes with clarity about "the communication of information to or through a physically embodied human being from a source...on some other level or dimension of reality other than the physical as we know it." He profiles recent channels and their sources, goes back to preliterate societies and the advent of monotheism and identifies as channels such figures as Moses, Solomon, Muhammad, Merlin, Nostradamus, Swedenborg and Edgar Cayce. He discusses the sorts of people who are channels, kinds of information channeled, sources of information channeled and varieties of channeling like clairvoyance and automatic writing. According to Klimo, few people tap into their abilities to perform channeling and for those who think they can, he serves as guide.

For over thirty years, Stephen Braude has studied the paranormal in everyday life, from extrasensory perception and psychokinesis to mediumship and materialization. The Gold Leaf Lady and Other Parapsychological Investigations is a highly readable and often amusing account of his most memorable encounters with such phenomena. Here Braude recounts in fascinating detail five particular cases—some that challenge our most fundamental scientific beliefs and others that expose our own credulousness. Braude begins with a south Florida woman who can make thin gold-colored foil appear spontaneously on her skin. He then travels to New York and California to test psychokinetic superstars—and frauds—like Joe Nuzum, who claim to move objects using only their minds. Along the way, Braude also investigates the startling allegations of K.R., a policeman in Annapolis who believes he can transfer images from photographs onto other objects—including his own body—and Ted Serios, a deceased Chicago elevator operator who could make a variety of different images appear on Polaroid film. Ultimately, Braude considers his wife's surprisingly fruitful experiments with astrology, which she has used to guide professional soccer teams to the top of their leagues, as well as his own personal experiences with synchronicity—a phenomenon, he argues, that may need to be explained in terms of a refined, extensive, and dramatic form of psychokinesis. Heady, provocative, and brimming with eye-opening details and suggestions, The Gold Leaf Lady and Other Parapsychological Investigations will intrigue both adherents and detractors of its controversial subject matter alike.
