"Should be read by anyone interested in understanding the future," *The Times Literary Supplement* raved about the original edition of *The Social Life of Information*. We're now living in that future, and one of the seminal books

of the Internet Age is more relevant than ever. The future was a place where technology was supposed to empower individuals and obliterate social organizations. Pundits predicted that information technology would spell the end of almost everything—from mass media to bureaucracies, universities, politics, and governments. Clearly, we are not living in that future. The *Social Life of Information* explains why. John Seely Brown and Paul Duguid show us how to look beyond mere information to the social context that creates and gives meaning to it. Arguing elegantly for the important role that human sociability plays, even—perhaps especially—in the digital world, *The Social Life of Information* gives us an optimistic look beyond the simplicities of information and individuals. It shows how a better understanding of the contribution that communities, organizations, and institutions make to learning, working, and innovating can lead to the richest possible use of technology in our work and everyday lives. With a new introduction by David Weinberger and reflections by the authors on developments since the book's first publication, this new edition is essential reading for anyone seeking to understand the human place in a digital world. The *CSE Manual for Authors, Editors, and Publishers* American Psychological Association (APA) Master APA style and format quickly and easily! Written by experienced psychology instructors Beth M. This volume pulls together research on several aspects of the self. One set of chapters deals with the importance of building a self based on authenticity and "Who I really am."; a second group deals with the ways in which we defend views of the self as positive and powerful; a third group is concerned with multiple aspects of self regulation. Each of the chapters is a well-written, non-technical description of an important, currently active research program.
