Books

For Iris, childhood memories are of long hot summers spent playing with her cousin Rosmarie in her grandmother's garden, a place where redcurrants turned to pale tears on the branches of trees and beautiful Aunt Inga shook sparks from the tips of her fingers. But now her

grandmother is dead and, along with inheriting the property, Iris finds that she also inherits her family's darkest secrets. Reluctant to keep it, but reluctant to sell, Iris spends one more summer at the house. By day she swims at the local lake, where she rediscovers a childhood companion. Alone at night she roams through the familiar rooms,

exploring the tall black shadows of the past. In the flicker between remembrance and forgetting, Iris recalls an enigmatic grandfather who went to war and came back a different man, the night her cousin Rosmarie fell through the conservatory roof and shattered her family's lives, and a moment of love that made the old tree in the orchard bloom overnight.

[Damn Delicious](#) Holiday House

Myles and his family go to his grandparents' apple ranch, where they have a wonderful time picking and selling apples together.

Sally's Baking Addiction

HarperCollins UK

We have a special tree in our yard -- an apple pie tree! Colorful collage illustrations follow each season as an apple tree grows leaves, fragrant blossoms, and tiny green apples. Soon the fruit is big, red, and ready to be picked. It's time to make an apple pie! Here is a celebration of apples and

how things grow -- sure to delight young readers all year long.

Saving Seeds, Preserving

Taste Ohio University Press

In his classic *A Geography of Oysters*, Rowan Jacobsen forever changed the way America talks about its best bivalve. Now he does the same for our favorite fruit, showing us that there is indeed life beyond Red Delicious--and even Honeycrisp. While supermarkets limit their offerings to a few waxy options, apple trees with

lives spanning human generations are producing characterful varieties--and now they are in the midst of a rediscovery. From heirlooms to new designer breeds, a delicious diversity of apples is out there for the eating. Apples have strong personalities, ranging from crabby to wholesome. The Black Oxford apple is actually purple, and looks like a plum. The Knobbed Russet looks like the love child of a toad and a potato. (But don't be fooled by its looks.) The D'Arcy Spice

leaves a hint of allspice on the tongue. Cut Hidden Rose open and its inner secret is revealed. With more than 150 art-quality color photographs, Apples of Uncommon Character shows us the fruit in all its glory. Jacobsen collected specimens both common and rare from all over North America, selecting 120 to feature, including the best varieties for eating, baking, and hard-cider making. Each is accompanied by a photograph, history, lore, and a list of characteristics. The

book also includes 20 recipes, savory and sweet, resources for buying and growing, and a guide to the best apple festivals. It's a must-have for every foodie.

Learn from home and explore the world with these fun and easy board books! Young children love to eat apples and go to orchards. Here's a Hello, World! board book that teaches toddlers all about how apples grow—from seed to sapling to tree to applesauce. Hello, World! is a series designed to introduce first nonfiction concepts to babies and toddlers. Told in clear and easy

terms ("Apple seeds start to grow when they are planted in soil and given sunlight, water, and fresh air") and featuring bright, cheerful illustrations, Hello, World! is a perfect way to bring science, nature, and culture into the busy world of a toddler, where learning never stops. Look for all the books in the Hello, World! series: •Solar System •Weather •Backyard Bugs •Birds •Dinosaurs •My Body •How Do Apples Grow? •Ocean Life •Moon Landing •Pets •Arctic Animals •Construction Site •Rainforest Animals •Planet Earth •Reptiles •Cars and Trucks •Music •Baby Animals •On the Farm The Taste of Apples Penguin The Brown Goose, the White

Case Knife, Ora’s Speckled Bean, Radiator Charlie’s Mortgage Lifter — these are just a few of the heirloom fruits and vegetables you’ll encounter in Bill Best’s remarkable history of seed saving and the people who preserve both unique flavors and the Appalachian culture associated with them. As one of the people at the forefront of seed saving and trading for over fifty years, Best has helped preserve numerous varieties of beans, tomatoes, corn, squashes, and other fruits and vegetables, along with the family stories and experiences that are a fundamental part of this world. While corporate agriculture privileges a few flavorless but hardy varieties of daily vegetables, seed savers have worked tirelessly to preserve genetic diversity and the flavors rooted in the Southern Appalachian Mountains — referred to by plant scientists as one of the vegetative wonders of the world. Saving Seeds, Preserving Taste will introduce readers to the cultural traditions associated with seed saving, as well as the remarkable people who have used grafting practices and hand-by-hand trading to keep alive varieties that would otherwise have been lost. As local efforts to preserve heirloom seeds have become part of a growing national food movement, Appalachian seed savers play a crucial role in providing alternatives to large-scale agriculture and corporate food culture. Part flavor guide, part people’s history, Saving Seeds, Preserving Taste will introduce you to a world you’ve never known — or perhaps remind you of one you remember well from your childhood.

[The Botany of Desire](#) Penguin Updated with a brand-new selection of desserts and treats, the fully illustrated Sally's Baking Addiction cookbook offers more than 80 scrumptious recipes for indulging your sweet tooth—featuring a chapter of healthier dessert options, including some vegan and gluten-free recipes. Lost Feast Random House Trade Paperbacks
The first novel from the New York Times bestselling author of *The Idiot Girls'* *Action-Adventure Club* is a rollicking tale of small-town peculiarity, dark secrets, and one extraordinary beauty pageant. When her husband is offered a post at a small university, Maye is only too happy to pack up and leave the relentless Phoenix heat for the lush green quietude of Spaulding, Washington. While she loves the odd little town, there is one thing she didn't anticipate: just how heartbreaking it would be leaving her friends behind. And when you're a childless thirtysomething

freelance writer who works at home, making new friends can be quite a challenge. After a series of false starts nearly gets her exiled from town, Maye decides that her last chance to connect with her new neighbors is to enter the annual Sewer Pipe Queen Pageant, a kooky but dead-serious local tradition open to contestants of all ages and genders. Aided by a deranged former pageant queen with one eyebrow, Maye doesn't just make a splash, she uncovers a sinister mystery that has haunted the town for decades. "[Laurie Notaro] may be the funniest writer in this solar system."—The Miami Herald

Hello, World! How Do Apples Grow? ECW Press

“Pollan shines a light on our own nature as well as on our implication in the natural world.” —The New York Times “A wry, informed pastoral.” —The New Yorker The book that helped make Michael Pollan, the New York Times bestselling author of *How to Change Your Mind*, *Cooked* and *The Omnivore’s Dilemma*, one of the most trusted food experts in America Every schoolchild learns about the

mutually beneficial dance of honeybees and flowers: The bee collects nectar and pollen to make honey and, in the process, spreads the flowers’ genes far and wide. In *The Botany of Desire*, Michael Pollan ingeniously demonstrates how people and domesticated plants have formed a similarly reciprocal relationship. He masterfully links four fundamental human desires—sweetness, beauty, intoxication, and control—with the plants that satisfy them: the apple, the tulip, marijuana, and the

potato. In telling the stories of four familiar species, Pollan illustrates how the plants have evolved to satisfy humankind's most basic yearnings. And just as we've benefited from these plants, we have also done well by them. So who is really domesticating whom?

One Red Apple Millbrook Press
"With impeccable research and flawless prose, Chevalier perfectly conjures the grandeur of the pristine Wild West . . . and the everyday adventurers—male and female—who were bold enough or foolish enough to be drawn to the unknown. She crafts for us an

excellent experience." —USA Today
From internationally bestselling author Tracy Chevalier, author of *A Single Thread*, comes a riveting drama of a pioneer family on the American frontier 1838: James and Sadie Goodenough have settled where their wagon got stuck – in the muddy, stagnant swamps of northwest Ohio. They and their five children work relentlessly to tame their patch of land, buying saplings from a local tree man known as John Appleseed so they can cultivate the fifty apple trees required to stake their claim on the property. But the orchard they plant sows the seeds of a long battle. James loves the apples, reminders of an easier life back in

Connecticut; while Sadie prefers the applejack they make, an alcoholic refuge from brutal frontier life. 1853: Their youngest child Robert is wandering through Gold Rush California. Restless and haunted by the broken family he left behind, he has made his way alone across the country. In the redwood and giant sequoia groves he finds some solace, collecting seeds for a naturalist who sells plants from the new world to the gardeners of England. But you can run only so far, even in America, and when Robert's past makes an unexpected appearance he must decide whether to strike out again or stake his own claim to a home at last. Chevalier tells a fierce,

beautifully crafted story in *At the Edge of the Orchard*, her most graceful and richly imagined work yet.
