All aboard as the Bubble Guppies learn all about trains. Our Subway Baby Farrar, Straus and Giroux Tinderbox tells the exclusive, explosive, uninhibited true story of HBO and how it burst onto the American scene and screen to detonate a revolution and transform our relationship with television forever. The Sopranos, Game of Thrones, Sex and the City, The Wire, Succession...HBO has long been the home of epic shows, as well as the source for brilliant new movies, news-making documentaries, and controversial sports journalism. By thinking big, trashing tired formulas, and killing off cliches long past their primes, HBO shook off the shackles of convention and led the way to a bolder world of content, opening the door to all that was new, original, and worthy of our attention. In Tinderbox, award-winning journalist James Andrew Miller uncovers a bottomless trove of secrets and surprises, revealing new conflicts, insights, and analysis. As he did to great acclaim with SNL in Live from New York; with ESPN in Those Guys Have All the Fun; and with talent agency CAA in Powerhouse, Miller continues his record of extraordinary access to the most important voices, this time speaking with talents ranging from Abrams (J. J.) to Zendaya, as well as every single living president of HBO—and hundreds of other major players. Over the course of more than 750 interviews with key sources, Miller reveals how fraught HBO's journey has been, capturing the drama and the comedy off-camera and inside boardrooms as HBO created and mobilized a daring new content universe, and, in doing so, reshaped storytelling and upended our entertainment lives forever. A World War II Story of Survival, Resilience, and Redemption Random House Books for Young Readers

Triple-track Train Race! Golden Books

Steam Train, Dream Train 1-2-3 Triple-track Train Race!

#1 New York Times bestseller "Essential reading for anyone interested in understanding and treating traumatic stress and the scope of its impact on society." —Alexander McFarlane, Director of the Centre for Traumatic Stress Studies A pioneering researcher transforms our understanding of trauma and offers a bold new paradigm for healing in this New York Times bestseller Trauma is a fact of life. Veterans and their families deal with the painful aftermath of combat; one in five Americans has been molested; one in four grew up with alcoholics; one in three couples have engaged in

physical violence. Dr. Bessel van der Kolk, one of the world's foremost experts on trauma, has spent over three decades working with survivors. In The Body Keeps the Score, he uses recent scientific advances to show how trauma literally reshapes both body and brain, compromising sufferers' capacities for pleasure, engagement, self-control, and trust. He explores innovative treatments—from neurofeedback and meditation to sports, drama, and yoga—that offer new paths to recovery by activating the brain's natural neuroplasticity. Based on Dr. van der Kolk's own research and that of other leading specialists, The Body Keeps the Score exposes the tremendous power of our relationships both to hurt and to heal—and offers new hope for reclaiming lives.

Sophie's World Penguin

Make workplace conflict resolution a game that EVERYBODY wins! Recent studies show that typical managers devote more than a quarter of their time to resolving coworker disputes. The Brain That Changes Itself DIANE Publishing

This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Hide-and-go-swim! Henry Holt and Company

"Fascinating. Doidge's book is a remarkable and hopeful portrait of the endless adaptability of the human brain."—Oliver Sacks, MD, author of The Man Who Mistook His Wife for a Hat What is neuroplasticity? Is it possible to change your brain? Norman Doidge's inspiring guide to the new brain science explains all of this

and more An astonishing new science called neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain. Psychoanalyst, Norman Doidge, M.D., traveled the country to meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they've transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving, inspiring book that will permanently alter the way we look at our brains, human nature, and human potential.
