Digital Filmmaking has been called the bible for professional filmmakers in the digital age. It details all of the procedural, creative, and technical aspects of pre-production, production, and post-production within a digital filmmaking environment. It examines the new digital methods and techniques that are redefining the filmmaking process, and how the evolution into digital filmmaking can be used to achieve greater creative flexibility as well as cost and time savings. The second edition includes updates and new information, including four new chapters that examine key topics like digital television and high definition television, making films using digital video, 24 P and universal mastering, and digital film projection. Digital Filmmaking provides a clear overview of the traditional filmmaking process, then goes on to illuminate the ways in which new methods can accomplish old tasks. It explains vital concepts, including digitization, compression, digital compositing, nonlinear editing, and on-set digital production and relates traditional film production and editing processes to those of digital techniques. Various filmmakers discuss their use of digital techniques to enhance the

creative process in the "Industry Viewpoints" sections in each chapter .
Elderly Abuse and Mental Illness CRC Press
Elderly Abuse and Mental Illness By: John Walshe The main point of this book is to raise the question that the great Greek philosopher Plato raised almost two thousand five hundred years ago. Should we prosecute and incarcerate the elderly? Let me also ask: should we prosecute and incarcerate the mentally ill, as we do now? Lastly, how should we treat the elderly who have mental breakdowns as so many will? If the answers are yes, should we just punish as being imprisoned does—and should they also be abused? This document illustrates the atrocities that can happen when we don ' t recognize and appreciate the limitations of the mentally ill and elderly.
