Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

Two families are changed forever after two horrific murders. Centering on the lives of the brothers in each family, *The Sons of America* is an explosive epic that depicts the struggle of modern life in the United States. The first family lives in a dysfunctional household. A drunk, abusive father terrorizes the two brothers. After suffering for years, and in a

moment of self-preservation, the two decide that something must finally be done to protect not only themselves, but their weak and aging mother as well. During an abusive episode the brothers decide to deal with their father once and for all. The murder sets them on a path of self-destruction and they join a group of domestic terrorists. The second family is a group of Puerto Rican immigrants living in New York. The three central brothers are exposed to the mean life on the streets of New York. After a miscreant murders the oldest brother, the second eldest, Rocco, devotes his life to law enforcement to avenge him. The lives of both groups of siblings collide as the two patricidal brothers try to outrun justice. Rocco, now an FBI agent, must find them to answer for their crime. Can Rocco bring the killers to justice? This thriller is packed with action and invites readers into a world of urban violence, moral intrigue, and street justice. About the Author J. This book addresses the UNITED STATES OF AMERICA - the "Nation under God" - the foremost nation of this generation. With her destiny securely hid in God - for in "God We Trust" - this nation has been graced by Him to not only shape her future but that of other nations worldwide as well. This divine mandate - to oversee other nations - has most unfortunately brought her into confrontation with the evil forces that rule these nations. The greatest of these forces being FEAR - especially as propagated by terrorists. Terrorism has posed the greatest danger to universal freedom. And once more there is a summons for America to stand up against this

dark threat of violence against the future. FEAR is the terrorists' greatest weapon. Therefore, our primary strategy to defeating terrorism is to refuse to fear. As said President F.D. Roosevelt "the only thing we have to fear is fear itself. which paralyzes needed efforts to convert retreat into advance." Rev. Mbijiwe Mwenda, a former Kenya Air Force officer, is the Founder and President of Resurrection Glory Ministries International (RGMI) and the Senior Pastor of the Glory Cathedral Church (GCC) based in Nairobi, Kenya. Known best internationally for his life-changing writings, he has authored several books including: *Understanding Dreams and Visions*; *Identifying and Breaking Ungodly Family Altars*; *Identifying and Breaking Sexual Altars*; *Breaking the Curse of Poverty*; *God's Supernatural Power to Make Wealth and Seated With Christ in the Heavenly Places to Rule*. He also writes for several Christian Magazines in Kenya including the authoritative *Revival Springs* magazine. He is married to Annie Zoe, and both live in Nairobi-Kenya, happily serving the Lord.

"Gould's attention to the ironies and ambivalences that abound in the practice of homesteading provides fresh and insightful perspective."--Beth Blissman, Oberlin College "This luminously written ethnography of the worlds that homesteaders make significantly broadens our understanding of modern American religion. In richly textured descriptions of the everyday lives and work of the homesteaders with whom she lived, Gould helps us understand how the tasks of clearing land, making bread, and building a garden wall were ways of taking on the most urgent issues of meaning and ethics."--Robert A. Orsi, Harvard University "This is a fascinating, authoritative, and accessible look at one of America's most important subcultures. If you ever get around to building that cabin

in the woods, or especially if you don't, you'll want this volume on the bookshelf."--Bill McKibben, author of *Wandering Home: A Long Walk Across America's Most Hopeful Landscape*

"Rebecca Gould's compelling book on American homesteading brings the study of the religion-nature connection in the U.S. to a new place."--Catherine L. Albanese, author of *Nature Religion in America: From the Algonkian Indians to the New Age*

"Gould provides brand new data and sheds new interpretive light on familiar figures and movements. *At Home in Nature* is a model of how to seamlessly blend ethnography and history."--Bron Taylor, University of Florida, editor of the *Encyclopedia of Religion and Nature Problems of Vision* Springer Science & Business Media

The prophet Amos is known for fiery messages directed at the elites of the northern kingdom of Israel in ancient times. Can this prophet also speak to us in America today? This book looks at the message that Amos proclaimed and applies it to parallel situations in modern America. Issues such as the worship of wealth (greed), privilege, and elites living off the labor of others are more similar in these two times and places than one might initially assume. How can we respond as people of faith to the evils of our own time? Are we responsible to notice and take action? Is taking such action part of our faith? If we listen to the prophet Amos, the answer is a resounding "yes." God cares about the weak, the oppressed, and the downtrodden, and looks to those with the means to help implement change. We are truly asked to take responsibility for the well-being of our neighbor. Christians would be especially challenged by this book and the message of the prophet Amos, because so much of that message was also proclaimed by Jesus, who based judgment on how one treated the least, rather than those who are great. With study and thought questions with each chapter, and an abundance of suggestions for practical action, this book is a great tool to use in a church-wide study combined with a call to action.

The forces of globalization, technology, and information diffusion, as well as the processes of democratic consolidation have served to improve and expand opportunities for business in Latin American markets. These changes have not occurred uniformly, and this insightful book will help future business leaders determine which economies are likely to prosper, and therefore present better business opportunities for the foreseeable future. A chapter dedicated to the history of Latin America helps readers understand why things appear the way they do, giving them the context they need to understand the underlying business conditions. The book also addresses key challenges and issues that are unique to Latin America, and offers practical advice for tackling them. Each chapter features a focus country in order to provide a more in-depth understanding of what business opportunities exist in this region, how

businesses operate and thrive there, as well as what internal and external factors affect the ability to do business in Latin America. The cases at the end of each chapter explore actual business ventures in a particular country. A highly practical book, *Navigating Commerce in Latin America* will give international business people the tools they need to manage successful businesses in this region.

'Tatum...does a masterful job of cutting through the many obscurities and complexities of the events surrounding the Kid's brief life. He manages to demonstrate convincingly the manner in which the 'invented' Kid is logical product of the cultural preoccupation so the age that produces him. This is probably the best book on Billy the Kid produced to date.'

Muslim Women in Contemporary North America is a provocative study of how strongly held and divergent opinions, values, and beliefs, as well as misconceptions, overgeneralizations, and political agendas pertaining to Muslim women in the region, enter the public frame of reference. Interrogating contested topics in a series of case studies from both Canada and the United States, this book probes below the surface in pursuit of deeper understanding and more productive dialogue. Chapters analyze controversies over "clash" literature, dissident reformists, female religious leadership, veils, and the nature of emancipation in a compelling examination of the ways in which "Muslim," "American," and "Canadian" identities and values are being defined, differentiated, and projected. By pinpointing both sources of dissonance and unexpected patterns of resonance among complex, composite, and at times overlapping identity constellations, this book uncovers the impact of controversies on broader cultural negotiations in the United States and Canada. Transforming controversy and cliché into genuine conversation, *Muslim Women in Contemporary North America* is an invaluable resource for scholars and students in the fields of Islamic and Muslim Studies, Gender Studies, International Relations, Political Science, and Sociology.

In 1981 *Robotics Bibliography* was published containing over 1,800 references on industrial robot research and development, culled from the scientific literature over the previous 12 years. It was felt that sensors for use with industrial robots merited a section and accordingly just over 200 papers were included. It is a sign of the increased research into sensors in production engineering that this

bibliography on both the contact and non-contact forms has appeared less than three years after that first comprehensive collection of references appeared. In a review; in 1975 Professor Warnecke of IPA, Stuttgart drew attention to the lack of sensors for touch and vision. Since then research workers in various companies, universities and national laboratories in the USA, the UK, Italy, Germany and Japan have concentrated on improving sensor capabilities, particularly utilising vision, artificial intelligence and pattern recognition principles. As a result many research projects are on the brink of commercial exploitation and development. This bibliography brings together the documentation on that research and development, highlighting the advances made in vision systems, but not neglecting the development of tactile sensors of various types. No bibliography can ever be comprehensive, but significant contributions from research workers and production engineers from the major industrialised countries over the last 12 years have been included.

The Americas and Oceania: Assessing Sustainability provides extensive coverage of sustainability practices in two regions linked culturally and historically by their relative isolation before the Columbian exchange, by their colonization after it, and by the challenges of pollution, resource overuse, and environmental degradation. Regional experts and international scholars focus on environmental history in areas such as the South Pacific islands, now particularly threatened by rising ocean levels due to climate change, and on countries whose governments and corporations can play a major role in promoting or discouraging sustainable choices: Brazil, an emergent power on the world stage; the United States, the world's third most populous nation; and New Zealand, seemingly on its way to becoming an enviable model of sustainable development.

Throughout history, works of literature have helped to shape public discussion of social, legal, and political issues. In this book, Barry R. Schaller draws on examples from American literature in presenting an analysis of the legal aspects of several major problems facing our society. After identifying the key legal relationships in society, the book focuses on problems of violence, loss of authority, diminished faith in the American dream of progress, and the challenges posed by immense social and technological change. The author offers a set of standards to serve as a guide to effective judicial decision making and to assist the public in evaluating the soundness of those

decisions.

The subject of this fascinating book is the rise, flourishing, and decline of the heliotropic myth, the centuries-old belief that all history is a succession of great civilizations developing, like the movement of the sun, from the East to the West. America is in this vision the last empire, indeed, the fulfillment of history. Esteemed historian Jan Willem Schulte Nordholt draws on works of world poetry and other sources in describing the importance of the heliotropic myth and shows how the expectation of a final completion of history gave meaning and coherence to our civilization and how the mythic yearning for a better world drove our ancestors to distant lands ever farther westward. Now in the twentieth century, with all western horizons gone and the realities of societal life - even in America - not so utopian, we no longer dare to believe in the values of the West and prefer to live instead with an extraordinarily tolerant cultural relativism. With the approach of the new millennium - once predicted by the heliotropic myth to be a time of brilliant living - Schulte Nordholt's work not only offers a perspective that will enhance all areas of study in American and world history, but provokes a fresh desire for the real meaning of human history.

America Fear No Evil Univ of California Press Laboratory experiences as a part of most U.S. high school science curricula have been taken for granted for decades, but they have rarely been carefully examined. What do they contribute to science learning? What can they contribute to science learning? What is the current status of labs in our nation's high schools as a context for learning science? This book looks at a range of questions about how laboratory experiences fit into U.S. high schools: What is effective laboratory teaching? What does research tell us about learning in high school science labs? How should student learning in laboratory experiences be assessed? Do all students have access to laboratory experiences? What changes need to be made to improve laboratory experiences for high school students? How can school organization contribute to effective laboratory teaching? With increased attention to the U.S. education system and student outcomes, no part of the high school curriculum should escape scrutiny. This timely book investigates factors that influence a high school laboratory experience, looking closely at what currently takes place and what the goals of those experiences are and should be. Science educators, school administrators, policy makers, and parents will all benefit from a better understanding of the need for laboratory experiences to be an integral part of the science curriculum-and how that can be accomplished. The ability to see deeply affects how human beings perceive and interpret the world around them. For most people, eyesight is part of everyday communication, social activities, educational and professional pursuits, the care of others, and the maintenance of personal health, independence, and mobility.

Functioning eyes and vision system can reduce an adult's risk of chronic health conditions, death, falls and injuries, social isolation, depression, and other psychological problems. In children, properly maintained eye and vision health contributes to a child's social development, academic achievement, and better health across the lifespan. The public generally recognizes its reliance on sight and fears its loss, but emphasis on eye and vision health, in general, has not been integrated into

daily life to the same extent as other health promotion activities, such as teeth brushing; hand washing; physical and mental exercise; and various injury prevention behaviors. A larger population health approach is needed to engage a wide range of stakeholders in coordinated efforts that can sustain the scope of behavior change. The shaping of socioeconomic environments can eventually lead to new social norms that promote eye and vision health. Making Eye Health a Population Health Imperative: Vision for Tomorrow proposes a new population-centered framework to guide action and coordination among various, and sometimes competing, stakeholders in pursuit of improved eye and vision health and health equity in the United States. Building on the momentum of previous public health efforts, this report also introduces a model for action that highlights different levels of prevention activities across a range of stakeholders and provides specific examples of how population health strategies can be translated into cohesive areas for action at federal, state, and local levels.
