Wood for Boat Building - Fyne Boat Kits

A few builders have built stitch-and-glue boats from exterior-grade wood that often has very thin face veneers and may contain voids. Unless the boat being built is specifically designed to be built from exterior grade plywood, this is a foolish and potentially dangerous practice. Exterior grade panels often contain voids that can cause the panel to suddenly crack, making it unsuitable for building hulls.

Wooden Boat Building Fyne Boat Kits

Build your own wooden boat under expert tuition on one of our boat building courses in

our fully-equipped workshop. You'll be part of a group of like-minded builders learning the craft of boatbuilding together. Our experienced instructors will help you assemble your own boat from start to finish. Most classes are 5½ days - a perfect one-week holiday, with your own boat to take home at the end. Boat Building - Fyne Boat Kits

Although wooden boat building

is too labour intensive for

wooden boats to compete

commercially with their plastic

counterparts, wood is still one

of the best structural

materials for small boats. Wood

and epoxy are used to build

some of the world's best multi-

hull sailing boats, sprint

kayaks and rowing shells. Wood

is up to 10 times stiffer than

fibreglass by weight and nearly

6 times stiffer than kevlar-

epoxy composite. Thus your

energy is used moving the boat,

not expended flexing the hull.

I am considering a Skerry kit build and I have a couple of questions: 1. I am looking at the lugsail rig. The study plans shows the mast position and rake is the same as for the sprit rig, but elsewhere I have read that the mast needs to be raked back to maintain balance of the rig and the centre of effort for the two rigs does look different in the plans.
